PRITIS X

PX-272-1 – Two-point 0-230 VAC/VDC Discrete Solid State Relay Output Terminal

The PX-272-1 Solid State Relay Output Terminal provides two 230VAC/VDC 0.3A outputs with LED status. Intended for use with

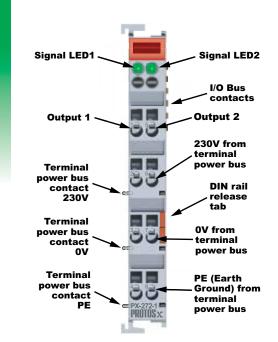

4-wire, 3-wire and 2-wire devices. Use with the Protos X[™] I/O System.

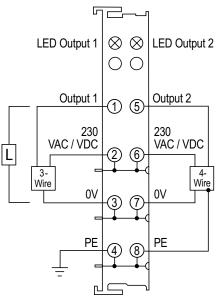

Protos X[™] is a trademark of Automationdirect.com Incorporated

PX-272-1 Output Terminal Specifications				
Outputs Per Terminal		2		
Commons Per Terminal		2		
Output Type		SSR (DC – sourcing only)		
Output Data Bytes Used		1/4 byte (2-bits)		
Output Power Source		230 VAC/VDC provided via terminal power bus		
Current Consumption (from Terminal Power Bus)		(ON resistance max 100mΩ) + load		
Operating Voltage		0 to 230 VAC/VDC (DC 100Hz)		
Maximum Load Current		0.3A per point		
Maximum Leakage Current		< 1mA (off state)		
Maximum Inrush Current		0.5A for 20S, 1.5A for 100mS		
Contact Resistance		Тур. 2.1Ω, Мах. 3.2Ω		
Surge Voltage Protection		From 400VAC		
Load Type		Resistive, inductive		
Current Consumption (from I/O Bus)		10mA		
Electrical Isolation		500V _{ms} (I/O bus/field potential), 2500VDC (1 min.)		
Heat Dissipation		1W max		
Switch-OnTime		4 - 6 ms		
Switch-Off Time		0.05 - 0.1 ms		
Switch On-Delay		320µS		
Switch Off-Delay		6.2mS		
Adjacent Mounting on Bus Terminals with Power Contact		Yes, 230 VAC/VDC only		
Adjacent Mounting on Bus Terminals without Power Contact		No		
Passes Terminal Bus Power		Yes		
Passes PE Bus		Yes		
Status Indicators		2, indicates output is on		
General Specificatio	ns			
Operating Temperature	32° to 131°F (0° to 55°C)			
Storage Temperature	13° to 185°F (-25° to 85°C)			
Relative Humidity	5% to 95%, non-condensing			
Environment Air	No corrosive gases permitted			
Mounting/Orientation Restrictions	35mm DIN rail/None			
Vibration	conforms to EN 60068-2-6			
Shock	conforms to EN 60068-2-27, EN 60068-2-29			
Noise Immunity	conforms to EN 61000-6-2/ EN61000-6-4			
Protection Class	IP20			
Weight	55g			
Dimensions (WxHxD)	12 x 100 x 68.8 mm (0.47 x 3.94 x 2.71 in)			
Agency Approvals UL File No. E		157382, CE

2X 272 1 Output Terminal Specific

Note: Terminal PX-908 is recommended to isolate terminal power or use PX-970 to supply and isolate power.

MOUNTING

For system assembly, first attach a bus coupler by snapping onto 35mm DIN rail and securing into position using the DIN rail locking wheel (where applicable) located on the left side of the coupler. To add a bus terminal, insert unit onto right side of bus coupler using the tongue and groove at the top and bottom of the unit, pressing gently until it snaps onto the DIN rail. A proper connection cannot be made by sliding the units together on the DIN rail. When correctly installed, no significant gap can be seen between the attached units. Bus connection is made through the six slide contacts located on the upper right side of the units. Add up to 64 bus terminals per bus coupler, including a bus end terminal.

REMOVAL

A locking mechanism prevents individual units from being pulled off. For bus terminal removal, pull the orange DIN rail release tab firmly to unlatch the unit from the rail. If attached to other terminal units, slide unit forward until released. For bus couplers with locking wheels, release the DIN rail locking wheel, then pull firmly on DIN rail release tab.

Insert unit using tongue and groove molded guide and press gently until it becomes firmly seated on DIN rail.

Where applicable, rotate Locking Wheel to lock Bus Coupler

molded guide

Where applicable, rotate Locking Wheel to unlock Bus Coupler

Firmly pull DIN Rail Release Tab to unlatch unit from rail.

IMPORTANT

For complete assembly instructions and compatibility between terminals see the PX-USER-M manual available for free download at www.automationdirect.com.

HOT SWAP NOT PERMITTED

Always remove power from the system before inserting or removing bus terminals or couplers as failure to do so could cause malfunction or damage to the terminals, couplers or other connected devices.

WARNING

To minimize the risk of potential safety problems, you should follow all applicable local and national codes that regulate the installation and operation of your equipment. These codes vary from area to area and it is your responsibility to determine which codes should be followed, and to verify that the equipment, installation, and operation are in compliance with the latest revision of these codes.

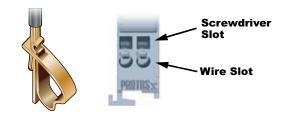

Equipment damage or serious injury to personnel can result from the failure to follow all applicable codes and standards. We do not guarantee the products described in this publication are suitable for your particular application, nor do we assume any responsibility for your product design, installation, or operation.

If you have any questions concerning the installation or operation of this equipment, or if you need additional information, please call Technical Support at 770-844-4200.

This publication is based on information that was available at the time it was printed. At AutomationDirect. com® we constantly strive to improve our products and services, so we reserve the right to make changes to the products and/or publications at any time without notice and without any obligation. This publication may also discuss features that may not be available in certain revisions of the product.

WIRING CONNECTION

Wire connection is made through a spring clamp style terminal. This terminal is designed for a single-conductor solid or stranded wire. Wire connection is made by firmly pushing the screwdriver into the screwdriver slot, inserting the wire into the wire slot and removing the screwdriver, locking the wire into position.

Wiring Specifications			
Connection Type	Spring Clamp Terminals		
Wire Gauge / Wire Cross Section	28-14 AWG / 0.08 - 2.5mm ²		
Screwdriver Width	2.5mm (0.10) such as our TW-SD-MSL-2		
Wire Stripping Length	8mm
