Do-more H2 Series PLC Overview

The Do-more H2 Series PLC is the first PLC series that we introduce to you as a part of the Do-more PLC family. The Do-more H2 Series PLC utilizes most of the modules that we have been selling as the DL205 PLC. You just need to install a Do-more H2 Series CPU module into the DL205 base unit. However, the specifications of the Do-more H2 Series PLC are very different from the DL205 PLC. This overview covers the key features of the Do-more H2 Series PLC.

Do-more H2 CPU Module

DL205 PLC base unit and I/O modules

The Do-more H2 Series PLC is designed around a new control engine with a new, advanced Do-more Instruction Set for ladder programs. The new Do-more Designer software, with advanced programming and monitoring features, will be used to create your new programs.

NOTE: Because the Do-more PLC supports a new instruction set and new memory addressing for ladder programming, the user project made for the DL205 PLC CANNOT be used in the Do-more PLC. The DL205 user project needs to be recreated from scratch for the Do-more PLC.

Do-more/DL205 System Compatibility

The following table lists DL205 components that are supported by the H2-DM1 and H2-DM1E Do-more CPUs.
