

# ACU AMP® ACTS Series AC Current Transducer/ Switch

The ACTS Series AC Current Sensors combine a current operated switch and transducer into a single package. In addition to an analog output over the sensed current range, the sensor also provides a solid-state switched output which will change state when the current exceeds an adjustable setpoint or falls below the normal running current. The ACTS features a digital display that gives visual indication of the switch setpoint allowing for a much easier and precise adjustment. The display flashes on and off when current has exceeded the setpoint. This combination switch and transducer

unit results in reduced installation time, plus the option to have local control of a starter coil while also sending the analog signal back to a controller housed in a separate cabinet.

## Applications

### Electronic Proof of Operation

- Current operated switches eliminate the need for multiple pipe or duct penetrations and are more reliable than electromechanical pressure or flow switches.

### Conveyors

- Detect jams and overloads.
- Interlock multiple conveyor sections.

### Pump Control

- Provides signal to measure current and shuts down the pump if the current rises over the setpoint.

### Cooling Towers

- Analog monitors time of use and contact opens if a filter clogs.

## Features

- N.O. solid-state switch for control circuits up to 240 VAC.
- 4-20mA Analog Output
- Compatible with most automation systems.
- Easily Adjustable and Precise Setpoint using digital display
- Display flashes on and off when current has exceeded the setpoint.
- Built-in mounting feet with optional DRA-2B 35mm DIN rail adapter available.
- Five-year warranty

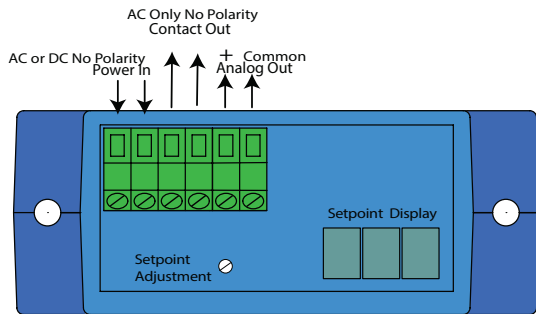

ACTS Series AC Current Transducer/Switch					
Part Number	Description	Pcs/Pkg	Wt (lb)	Price	
<b>ACTS050-42AA-24-FD</b>	AcuAMP AC current transducer/switch, 1-phase, fixed core, 0-50A sensing range, 1-50A adjustable trip point, single-turn potentiometer with trip point display, 4-20 mA or solid state switch, N.O. output, 1A @ 240 VAC output rating.	1	0.39	\$165.00	
<b>ACTS200-42AA-24-FD</b>	AcuAMP AC current transducer/switch, 1-phase, fixed core, 0-200A sensing range, 4-200A adjustable trip point, single-turn potentiometer with trip point display, 4-20 mA or solid state switch, N.O. output, 1A @ 240 VAC output rating.	1	0.39	\$165.00	
Accessories					
<b>DRA-2B</b>	35mm DIN rail adapters, 1.70"x0.45"x0.83" [43.7x11.4x21.0 mm]	2	0.40	\$6.00	

ACTS Series Specifications	
<b>Power Required</b>	24 VAC/DC (+/-10%)
<b>Power Consumption</b>	< 2VA
<b>Outputs</b>	Solid state switch, N.O. and analog output
<b>Switch Rating</b>	1A @ 240VAC maximum
<b>Offstate Leakage</b>	< 10µA
<b>Switch Response Time</b>	0.50 sec. 5% over set point, 0.20 sec. 50% over set point, 0.15 sec. 100% over set point
<b>Switch Hysteresis</b>	5% of setpoint
<b>Switch Setpoint Range</b>	1-50 Amps (ACTS050), 4-200 Amps (ACTS200)
<b>Switch Setpoint Adjust</b>	Single turn potentiometer, Setpoint displayed on sensor
<b>Sensed Current Limit</b>	1.1x range continuous, 3x range for 6 seconds, 5x range for 1 second
<b>Analog Output Signal</b>	4-20mA
<b>Analog Output Impedance</b>	500Ω max
<b>Analog Output Response</b>	< 0.30 sec. 90% step change, < 0.40 sec. 100% step change
<b>Accuracy</b>	1% Full Scale
<b>Isolation Voltage</b>	UL508, UL tested to 1480VAC
<b>Frequency Range</b>	40-400 Hz, Average Responding
<b>Sensing Aperture</b>	0.75 in (19mm) dia.
<b>Environmental</b>	-Temp -4 to 122°F (-20 to 50°C) -Humidity 0-95% RH, Non-condensing -Pollution degree 2 -Altitude 2000 meters
<b>Case</b>	UL 94V-0 Flammability rated thermoplastic
<b>Certifications</b>	cULus listed E222847 CE

## Overview

The AcuAMP series of AC current sensors is a family of high-performance current sensors offering outstanding features, flexibility, and durability at an incredible Price. Choose from a wide selection of current transducers, switches and indicators, all designed in a rugged industry-standard feed-through package, including both fixed core and split core models.

AcuAMP current sensors are available with a broad selection of input sensing ranges for maximum flexibility across many current ratings. The current transducer output choices include 4-20 mA, 24VDC loop-powered, and 0 to 10 volt self-powered analog outputs. The Current Switch outputs include isolated solid state switches available in Normally Open and Normally Closed configurations or SPDT relays.

Models with output time delay are also offered in the Current Switch series. The ACL1 Current Indicator senses AC current ranging from 0.5 to 100A and requires no power for the indicating LED.

These current sensors can be mounted in a panel or attached to the monitored conductor with a wire tie. Use the Selection Guide below to find the best sensor for your requirements.

# AC Current Sensors, Switches and Transducers Application Guide

## Application Guide

ACUAMP current sensors are a great fit for many applications including material handling, fan and pump applications, and heating systems. With current transducers, current switches and current indicators, this sensor family gives you

valuable data for processes ranging from monitoring loads to preventive maintenance. Models with the ability to read True RMS non-sinusoidal waveforms make it easy to monitor applications using variable frequency drives.

Use the application examples to help choose the best sensor model for your application.

### Pump Jam & Suction Loss Protection

### Heater Life Prediction

### Crusher/Grinder/Shredder Motor Interlocks

The performance of size reduction equipment like crushers or grinders can be optimized by controlling the in-feed in order to:

- Help prevent jamming
- Improve the uniformity of the resultant product
- Enhance overall production efficiency

### Pump Load Monitoring

### Lamp Failure Detection

### Electric Motor Load Status
