## Safety

### General safety

All work on electrical systems or operating equipment may only be carried out by a specially qualified electrician according to the applicable electrotechnical regulations.

The safety of the system in which the SENSORswitch is integrated is the responsibility of the operator.

### Improper work on electrical systems!

Electric shock can result in death or life-threatening injuries.

► Before working on electrical systems, disconnect them from their voltage supply and secure them against being switched on again.

► Wear appropriate personal protective equipment (PPE).
