

# CWC Series Miniature Contactors

The CWC series mini contactors are a complete solution for switching and controlling motors. The CWC's compact dimensions for its IEC current rating, up to 22A, AC-3 utilization category, allows it to take up less space inside electrical enclosures while still maintaining a powerful 15hp @ 460V. Dimensions of the 7A to 16A contactors are the same for both AC or DC coil voltages, making the panel design and assembly easier. DC models feature low consumption coils allowing the CWC to be operated directly from a PLC without interface relays.

## Features

- Rated up to 15hp @ 460V
- Direct mounting to the WEG RW17D overload relay
- Frame size is identical for AC and DC coil contactors up to 16A (CWC07-16).
- CWC025 frame available with AC coil only
- Heavy-duty operation
- Tool-free DIN-rail mounting
- WEG 18-month warranty
- Snap-on accessories
- DC coil low consumption: 1.7–2.7 W
- DC coil standard consumption: 2.6–3.7 W

## Agency Approvals/ Certifications

- cULus listed (File No. E202315/E189202)

## Mechanical Interlock Block and Latch Block

Mechanical Interlock Block and Latch Block			
Part Number	Price	Description	For Use With
<b>BICO</b>	\$3.50	Mechanical interlock, front mounted, use with any CWC07 through CWC016 series miniature contactor. Mechanically connects two CWC series mini contactors and prevents both contactors from being pulled in at the same time. For reversing contactors.	CWC07 CWC09 CWC012 CWC016
<b>RMCO</b>	\$4.00	Latch block, front mounted, use with any CWC07 through CWC016 series miniature contactor. Mechanically connects two CWC series mini contactors and enables one contactor to operate with a pulse input signal. Retention block for contactor.	

Note: Do not use BICO or RMCO accessory with mini contactors with low consumption DC coils.

## Operation Description of Latched Block RMCO

- After a minimum pulse of 100ms on mini contactor's coil (K1), the RMCO will keep K1 contactor switched on;
- The mini contactor K1 will only return to rest position after miniature contactor's coil (K2) has been energized by a releasing pulse of 100ms;
- The mechanical latch only occurs when mini contactor (K1) is energized (ON).

**Note:** If RESET miniature contactor's coil (K2) remains energized, the latching of mini contactor (K1) is not enabled.
