## Joystick selector switch mounting on panel

- Twist and remove the ball from the operator.
- If no locking nut is provided, loosen the nut and remove the switch after the packing part (A) shown in the illustration is stretched to the lever groove.
- Mount the switch in the order opposite of removal. Set the packing to the notch on the lever as a reference. Do not separate the nut from the packing.
- Use a torque wrench to tighten the nut from the front of the panel. Recommended tightening torque is 1 to 1.5 N·m.

## 22mm Pilot Devices Cutouts

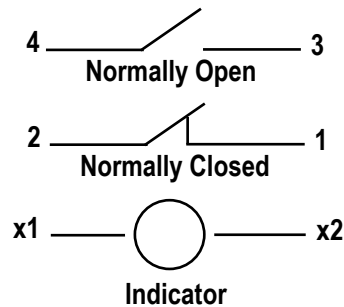

AR22 pilot devices can be mounted in either 22.3 or 25.5 mm diameter holes as shown in the figure below without any extra adapter.

Note: If key washer or legend plate is not used, 3.2 mm-wide location holes do not need to be cut out.

# Fuji Electric 22mm Pilot Devices Overview

## Pushbuttons, Selectors, Pilot Lights, Joysticks, Buzzers

Fuji Electric AR22 pilot devices can be mounted on panels up to 6mm thick by securing the operator with a locking nut from behind the panel without needing any adjustment.

### Easy mounting

Fuji AR22 pilot devices can be mounted on panels between 1 and 6mm thick and are mountable in panel cutouts of 22.3 or 25.5 mm. The button and lens can be mounted on a panel while the operator is engaged.

### Pushbuttons

**AR22F0R-01RZA**

### Illuminated Pushbuttons

**AR22F0L-10E3YZA**

### Pilot Lights

**DR22E3L-E3SZA**

### E-Stop Pushbuttons

**AR22V0R-01R**

### Selector Switches

**AR22PR-210BZA**

### Buzzers

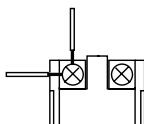

**DR22B8-EB**

### Wiring

These pilot devices can be wired in both vertical and lateral directions making wiring in narrow spaces easier. Contact block color coding makes wiring even easier.

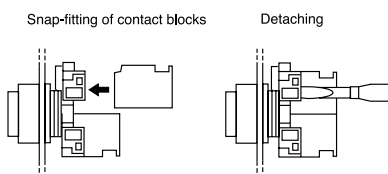

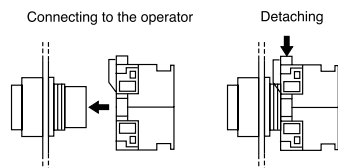

1N.O. Blue, 1N.C. Red

Lamp terminal and transformer unit: black

### Quick contact block and transformer replacement

Fuji AR22 pilot devices have a snap-on mounting that makes replacing or adding a contact block and transformer unit easier.

### Safety

AR22 pilot devices include terminal covers for added safety and security. Emergency stop pushbuttons include a trigger action mechanism that prevents the contacts from moving until the button is pushed and locked.

### Protection

AR22 pilot devices feature oil and dust-tight operator construction (IP65), except for buzzers DR22B5 (IP00), DR22B8 (IP54).

### Short depth

Fuji AR22 pilot devices are designed to occupy less space than traditional 22mm devices.
