### 1-800-633-0405 UL 489 or UL 1077? What are your Circuit Protection Requirements?

An understanding of circuit types and circuit protection products is critical to ensure their proper application. See NEC Sections 100, 430 and 409 for definitions.

The proper sizing of an overcurrent protection device is the responsibility of the customer and should be determined using the application standards of the NEC (National Electric Code), CEC (Canadian Electrical Code) or other

applicable standards. Per fine print note of 2008 NEC Section 100 "A current in excess of rating may be accommodated by certain equipment and conductors for a given set of conditions. Therefore, the rules for

overcurrent protection are specific for particular situations."

# **Gladiator** Miniature Circuit Breakers (UL 489)

Single-Pole

#### **Overview**

Gladiator miniature circuit breakers offer optimum and efficient protection for branch and control circuits up to 63 amps. The Gladiator series is available with B, C or D trip characteristics in accordance with UL 489. The Gladiator series units are DIN rail mountable and can be used in feeder and branch circuit applications.

### Listings

- UL Listed under UL 489 Category DIVQ E503708
- Category DIVQ E503708
   Category DIHS E509077
- CE LVD 2014/35/EU
- IEC/EN 60947-2

Two-Pole

### **Features and Benefits**

- Dual rated for AC or DC applications
- Complete range of UL 489 listed DIN rail mounted miniature circuit breakers up to 63 amp current rating
- Single-pole, two-pole and three-pole models
- Suitable for reverse feed applications
- Suitable for branch circuit device protection
- Thermal-magnetic overcurrent protection – three levels of short circuit protection, categorized by B, C and D curves
- B-curve magnetic trip point:
  3 to 5 times the rated current, typically used for resistive loads such as conductors or heaters.
- C-curve magnetic trip point: 5 to 10 times the rated current, typically used for small transformers, pilot devices, etc.
- D-curve magnetic trip point: 10 to 20 times the rated current, typically used for transformers or very high inductive loads.
- Trip-free design breaker cannot be defeated by holding the handle in the "ON" position
- Captive screws cannot be lost
- Can also be used in applications for which UL 1077 or CSA C22.2 No.235 are also allowed
- Field installable shunt trip and auxiliary switches, side mountable
- Module width of only 18mm [0.71 in] (per pole)
- Contact position indicator (red / green)
- 35mm DIN rail mountable, utilizing spring clip

Three-Pole

#### Full Line of Field Installable Accessories

- Auxiliary switch
- Alarm/auxiliary switch
- Shunt trip
- Padlock provision

### **Applications**

- Feeder and Branch Circuit Protection
- PLC I/O points
- Motor control circuits
- Control instrumentation
- Power supplies
- Relays
- Convenience receptacle circuits (internal / external)
- · Load circuits leaving the equipment (external)
- Computers
- UPS
- HACR Equipment (Heating Air Conditioning, Refrigeration)
- Power conditioners

# **Gladiator** Miniature Circuit Breakers

### **Tripping Characteristics**

Gladiator miniature circuit breakers are available with "B" or "C" or "D" tripping characteristics.

#### Type B trip curve

(3 to 5 times In)

B-curve devices are suitable for resistive loads such as conductors or heaters.

#### Type C trip curve

(5 to10 times In)

C-curve devices are suitable for applications where medium levels of inrush current are expected. Applications include small transformers, lighting, pilot devices, control circuits and coils. C-curve devices provide a medium magnetic trip point.

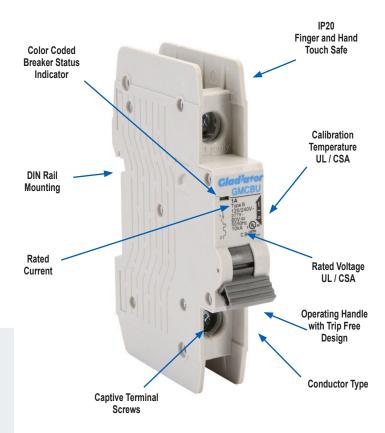

#### Type D trip curve

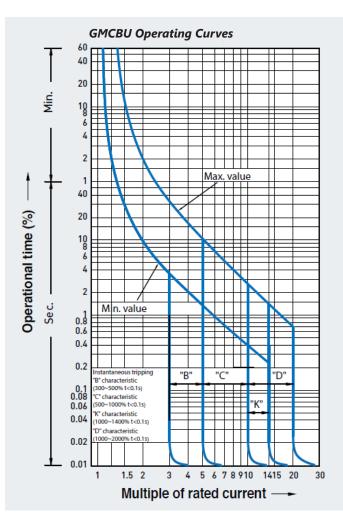

(10 to 20 times In)

D-curve devices are suitable for applications where high levels of inrush current are expected. The high magnetic trip point prevents nuisance tripping in high inductive applications such as motors, transformers and power supplies.

#### Labeling

The front of each Gladiator miniature circuit breaker is labeled for positive identification.

# **Gladiator Cuttable Busbars**

Gladiator busbars are the first cuttable UL489 rail and are available in a wide range of step spacings and cross-sections.

Whether you're feeding from the top, the bottom, centrally, or laterally, the Gladiator busbar system provides the flexibility you need to meet all requirements and any mounting situation.

Accessories such as feeder terminals and contactprotective, finger-safe end caps are also available.

These busbars are suitable for DC applications and for use in situations with a high degree of pollution.

#### **Features**

- For AC or DC applications
- One of the first cuttable UL489 busbars no special tools required
- For GMCB/GMCBU series MCBs and protectors
- Can be used with fuse holders according to UL 512
- Can be used with 1-, 2-, or 3-phase systems
- Rated for 80/100 A
- Center feeding at 160/200 A
- Available accessories include feeder terminals, finger-safe push-on terminal covers, and end caps
- Completely closed
- Protection class: IP 20
- 2014/35/EU (Low Voltage Directive)
- 2011/65/EU Annex II 2015/863/EU
