230V Three-Phase Input / Output		✓	✓	✓	✓

Overview

The GS1 series of AC drives is our most affordable and compact inverter, offering V/Hz control with general purpose application features. These drives can be configured using the built-in digital keypad (which also allows you to set the drive speed, start and stop, and monitor specific parameters) or with the standard RS-485 serial communications port. Standard GS1 features include one analog input, four programmable digital inputs and one programmable normally open relay output.

Features

- Simple Volts/Hertz control
- Pulse Width Modulation (PWM)
- 3–10 kHz carrier frequency
- IGBT technology
- 130% starting torque at 5Hz
- 150% rated current for one minute
- Electronic overload protection
- Stall prevention
- Adjustable accel and decel ramps
- S-curve settings for acceleration and deceleration
- Manual torque boost
- Automatic slip compensation
- DC braking
- Three skip frequencies
- Trip history
- Integral keypad and speed potentiometer
- Programmable jog speed
- Three programmable preset speeds
- Four programmable digital inputs
- One programmable analog input
- One programmable relay output
- RS-485 Modbus communications up to 19.2K
- Optional Ethernet communications
- DIN rail or panel mountable
- Two-year warranty
- UL/cUL/CE listed

Accessories

- AC line reactors
- RF filter
- Fuse kits and replacement fuses
- Ethernet interface
- Four and eight-port RS-485 multi-drop termination board
- Serial communication cables available for creating plug and play RS-232/RS-485 networks with AutomationDirect PLCs. See the comm cable matrix (pg.tGSX-181).
- GSoft drive configuration software
- USB-485M – USB to RS-485 PC adapter (see “Communications Products” chapter for detailed information)
- Detailed descriptions and specifications for GS accessories are available in the “GS/DURApulse Accessories” section.

Typical Applications

- Conveyors
- Fans
- Pumps
- Shop tools

GS1 Series Specifications

115V/230V CLASS GS1 Series			
Model		GS1-20P2	GS1-21P0
Price		Retired	Retired
Motor Rating	HP	1/4 hp	1hp
	kW	0.2 kW	0.7 kW
Rated Output Capacity (200V) kVA		0.6	1.6
Rated Input Voltage	Single/three-phase: 200–240 VAC ±10%; 50/60 Hz ±5%		
Rated Output Voltage	Three-phase corresponds to the input voltage		
Rated Input Current (A)		4.9/1.9	9.7/5.1
Rated Output Current (A)		1.6	4.2
Watt Loss @ 100% I (W)		18.4	44.6
Cooling Fan		no	yes
Weight: kg (lb)		2.20	2.20
Dimensions (HxWxD) (mm [in])	132.0 x 68.0 x128.1 [5.20 x 2.68 x 5.04]		
Accessories			
Line Reactor *	LR-1xxPx-xxx (refer to "GS/DURApulse Drives Accessories – Line Reactors" section for exact part #)		
RF Filter	RF220X00A		
Fuse Kit **	Single-Phase**	GS-20P2-FKIT-1P	n/a
	Three-Phase	GS-20P2-FKIT-3P	n/a
Replacement Fuses	Single-Phase	GS-20P2-FUSE-1P	GS-21P0-FUSE-1P
	Three-Phase	GS-20P2-FUSE-3P	n/a
Ethernet Communications module for GS Series Drives (DIN rail mounted)	GS-EDRV100		
USB to RS-485 PC Communication Adapter	USB-485M		
RS-485 Communication Distribution Module (for creating plug and play RS-485 networks)	ZL-CDM-RJ12X4 / ZL-CDM-RJ12X10		
RS-485 Serial Cable, GS Drive to DL06/D2-260	GS-485HD15-CBL-2		
RS-485 Serial Cable, GS Drive to ZIPLink CDM Module	GS-485RJ12-CBL-2		
Software	GSOFT		
* GS1-1xxx drives require 115V class input line reactors and 230V class output line reactors.			
** Single-phase fuse kits and fuses are used only with GS1-1xxx drives.			

GS1 General Specifications

General Specifications			
Control Characteristics			
Control System		Sinusoidal Pulse Width Modulation, carrier frequency 3kHz–10kHz	
Rated Output Frequency		1.0 to 400.0 Hz limited to 9999 motor rpm	
Output Frequency Resolution		0.1 Hz	
Overload Capacity		150% of rated current for 1 minute	
Torque Characteristics		Includes manual torque boost, auto-slip compensation, starting torque 130% @ 5.0Hz	
DC Braking		Operation frequency 60–0Hz, 0–30% rated voltage. Start time 0.0–5.0 seconds. Stop time 0.0–25.0 seconds	
Acceleration/Deceleration Time		0.1 to 600 seconds (can be set individually)	
Voltage/Frequency Pattern		V/F pattern adjustable. Settings available for Constant Torque – low and high starting torque, Variable Torque – low and high starting torque, and user configured	
Stall Prevention Level		20 to 200% of rated current	
Operation Specification			
Inputs	Frequency Setting	Keypad	Setting by <UP> or <DOWN> buttons or potentiometer
		External Signal	Potentiometer - 5kΩ 0.5W, 0 to 10 VDC (input impedance 47kΩ), 0 to 20 mA / 4 to 20 mA (input impedance 250Ω), Multi-function inputs 1 to 3 (3 steps, JOG, UP/DOWN command), RS485 communication setting
	Operation Setting	Keypad	Setting by <RUN>, <STOP> buttons
		External Signal	DI1, DI2, DI3, DI4 can be combined to offer various modes of operation, RS485 communication port
Outputs	Multi-Function Input Signal		Multi-step selection 0 to 3, Jog, Accel/decel inhibit, First/second accel/decel switch, Counter, PLC operation, External base block (N.C., N.O.) selection
	Multi-Function Output Signal		AC drive operating, Frequency attained, Non zero speed, Base Block, Fault indication, Local/remote indication, PLC operation indication
	Operating Functions		Automatic voltage regulation, S-curve, Over-voltage stall prevention, DC braking, Fault records, Adjustable carried frequency, Starting frequency setting of DC braking, Over-current stall prevention, Momentary power loss restart, Reverse inhibition, Frequency limits, Parameter lock/reset
Protective Functions		Overcurrent, overvoltage, undervoltage, electronic thermal motor overload, Overheating, Overload, Self testing	
Operator Interface	Operator Devices		5-key, 4-digit, 7-segment LED, 3 status LEDs, potentiometer
	Programming		Parameter values for setup and review, fault codes
	Parameter Monitor		Master Frequency, Output Frequency, Scaled Output Frequency, Output Voltage, DC Bus Voltage, Output Direction, Trip Event Monitor, Trip History Monitor
	Key Functions		RUN/STOP, DISPLAY/RESET, PROGRAM/ENTER, <UP>, <DOWN>
Environment	Enclosure Rating		Protected chassis, IP20
	Ambient Operating Temperature		-10° to 40°C (14°F to 104°F) w/o derating
	Storage Temperature		-20° to 60 °C (-4°F to 140°F) during short-term transportation period)
	Ambient Humidity		0 to 90% RH (non-condensing)
	Vibration		9.8 m/s ² (1G), less than 10Hz; 5.88 m/s ² (0.6G) 20 to 50 Hz
Installation Location		Altitude 1000m or lower above sea level, keep from corrosive gas, liquid and dust	
Options		Programming Software (GSOFT)	

GS1 Specifications - Installation

Understanding the installation requirements for your GS1 drive will help to ensure that it will operate within its environmental and electrical limits.

NOTE:

Never use only this catalog for installation instructions or operation of equipment; refer to the user manual, GS1-M.

Environmental Specifications	
Protective Structure ¹	IP20
Ambient Operating Temperature ²	-10 to 40 °C (14 to 104 °F)
Storage Temperature ³	-20 to 60°C (-4 to 140 °F)
Humidity	up to 90% (no condensation)
Vibration ⁴	5.9 m/s ² (0.6g), 10 to 55 Hz
Location	Altitude 1,000 m or less, indoors (no corrosive gases or dust)

1: Protective structure is based upon EN60529
 2: The ambient temperature must be in the range of -10 to 40 °C (14 to 104 °F). If the range will be up to 50 °C (122°F), you will need to set the carrier frequency to 3.0 kHz and derate the output current to 80% or less. See our web site for derating curves.
 3: The storage temperature refers to the short-term temperature during transport.
 4: Conforms to the test method specified in JIS C0911 (1984)

Watt Loss Chart	
GS1 Drive Model	At full load
GS1-20P2	18.4
GS1-21P0	44.6

* For painted sub-panels, scrape the paint from underneath the star washers before tightening them.

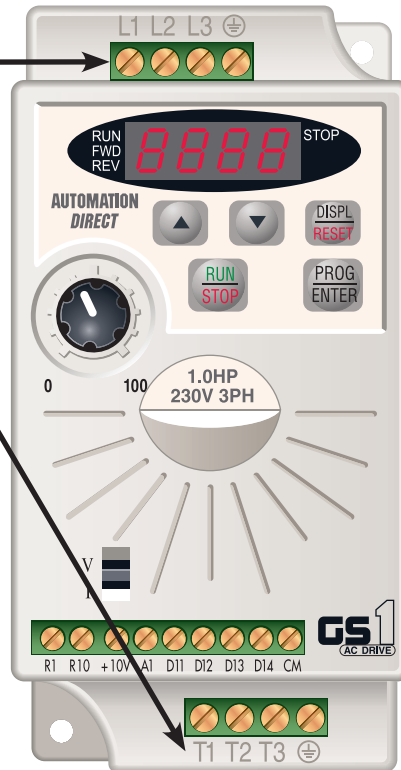

WARNING: AC DRIVES GENERATE A LARGE AMOUNT OF HEAT, WHICH MAY DAMAGE THE AC DRIVE. AUXILIARY COOLING METHODS ARE TYPICALLY REQUIRED IN ORDER TO NOT EXCEED MAXIMUM AMBIENT TEMPERATURES.

GS1 Specifications - Terminals

Main Circuit Wiring

Terminal	Description
L1, L2, L3	Input power
T1, T2, T3	AC drive output
⊕	Ground

Control Circuit Terminals

Terminal Symbol	Description
R10	Relay output 1 normally open
R1	Relay output 1 common
D11	Digital input 1
D12	Digital input 2
D13	Digital input 3
D14	Digital input 4
AI ¹	Analog input
+10V	Internal power supply (10 mA @ 10 VDC)
CM	Common

¹ 0 to +10 VDC, 0 to 20 mA, or 4 to 20 mA input represents zero to maximum output frequency.

Note: Use twisted-shielded, twisted-pair or shielded-lead wires for the control signal wiring. It is recommended all signal wiring be run in a separate steel conduit. The shield wire should only be connected at the drive. Do not connect shield wire on both ends.

GS1 Specifications - Basic Wiring Diagram

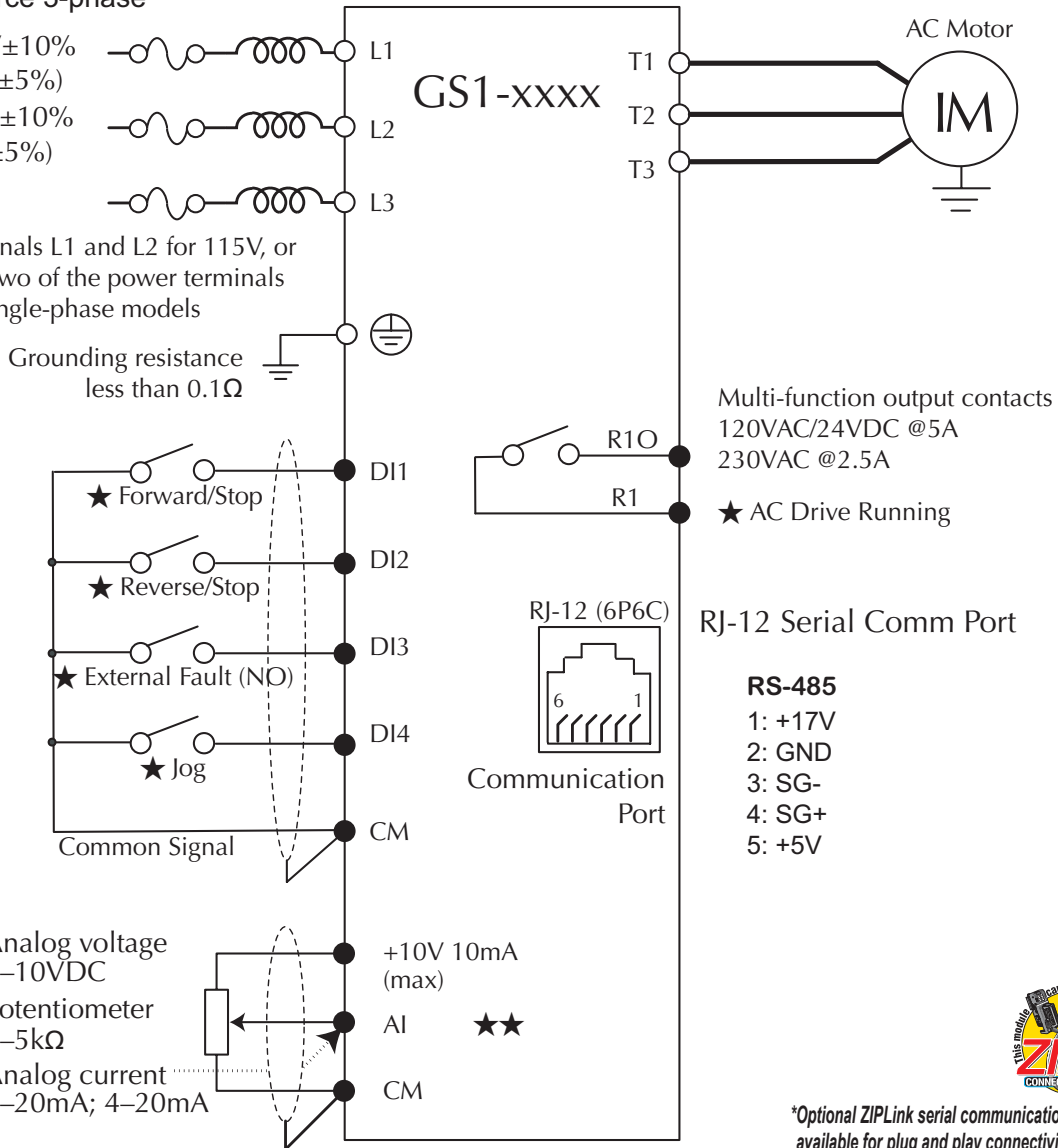

Note: Users **MUST** connect wiring according to the circuit diagram shown below. (Refer to user manual GS1-M for additional specific wiring information.)

Note: Please refer to the following pages for explanations and information regarding line reactors (pg.tGSX-134) and RF filters (pg.tGSX-170).

Power Source 3-phase*

100–120V±10%
(50/60Hz ±5%)
200–240V±10%
(50/60Hz±5%)

* Use terminals L1 and L2 for 115V, or select any two of the power terminals for 230V single-phase models

★ Factory default setting

★★ Factory default source of frequency command is via the keypad potentiometer

○ Main circuit (power) terminals ● Control circuit terminal ⊕ Shielded leads

DO NOT PLUG A MODEM OR TELEPHONE INTO THE GS1 RJ-12 SERIAL COMM PORT, OR PERMANENT DAMAGE MAY RESULT. TERMINALS 2 AND 5 SHOULD NOT BE USED AS A POWER SOURCE FOR YOUR COMMUNICATION CONNECTION.

*Optional ZIPLink serial communication cables available for plug and play connectivity to AutomationDirect PLCs. See the comm cable selection matrix on page [pg.tGSX-17](#).

GS1 Specifications - Dimensions

Unit: mm (in)

Wiring Solutions

Wiring Solutions using the ZIPLink Wiring System

ZIPLinks eliminate the normally tedious process of wiring between devices by utilizing prewired cables and DIN rail mount connector modules. It's as simple as plugging in a cable connector at either end or terminating wires at only one end. Prewired cables keep installation clean and efficient, using half the space at a fraction of the cost of standard terminal blocks. There are several wiring solutions available when using the ZIPLink System ranging from PLC I/O-to-ZIPLink Connector Modules that are ready for field

termination, options for connecting to third party devices, GS, DuraPulse and SureServo Drives, and specialty relay, transorb and communications modules. Pre-printed I/O-specific adhesive label strips for quick marking of ZIPLink modules are provided with ZIPLink cables. See the following solutions to help determine the best ZIPLink system for your application.

Solution 1: DirectLOGIC, CLICK and Productivity I/O Modules to ZIPLink Connector Modules

When looking for quick and easy I/O-to-field termination, a ZIPLink connector module used in conjunction with a prewired ZIPLink cable, consisting of an I/O terminal block at one end and a multi-pin connector at the other end, is the best solution.

Using the PLC I/O Modules to ZIPLink Connector Modules selector tables located in this section,

- 1. Locate your I/O module/PLC.
- 2. Select a ZIPLink Module.
- 3. Select a corresponding ZIPLink Cable.

Solution 2: DirectLOGIC, CLICK and Productivity I/O Modules to 3rd Party Devices

When wanting to connect I/O to another device within close proximity of the I/O modules, no extra terminal blocks are necessary when using the ZIPLink Pigtail Cables. ZIPLink Pigtail Cables are prewired to an I/O terminal block with color-coded pigtail with soldered-tip wires on the other end.

Using the I/O Modules to 3rd Party Devices selector tables located in this section,

- 1. Locate your PLC I/O module.
- 2. Select a ZIPLink Pigtail Cable that is compatible with your 3rd party device.

Solution 3: GS Series and DURAPULSE Drives Communication Cables

Need to communicate via Modbus RTU to a drive or a network of drives?

ZIPLink cables are available in a wide range of configurations for connecting to PLCs and SureServo, SureStep, Stellar Soft Starter and AC drives. Add a ZIPLink communications module to quickly and easily set up a multi-device network.

Using the Drives Communication selector tables located in this section,

- 1. Locate your Drive and type of communications.
- 2. Select a ZIPLink cable and other associated hardware.

Wiring Solutions

Solution 4: Serial Communications Cables

ZIPLink offers communications cables for use with *Direct*LOGIC, CLICK, and Productivity CPUs, that can also be used with other communications devices. Connections include a 6-pin RJ12 or 9-pin, 15-pin and 25-pin D-sub connectors which can be used in conjunction with the RJ12 or D-Sub Feedthrough modules.

Using the **Serial Communications Cables** selector table located in this section,

- 1. Locate your connector type
- 2. Select a cable.

Solution 5: Specialty ZIPLink Modules

For additional application solutions, ZIPLink modules are available in a variety of configurations including stand-alone relays, 24VDC and 120VAC transorb modules, D-sub and RJ12 feedthrough modules, communication port adapter and distribution modules, and SureServo 50-pin I/O interface connection.

Using the **ZIPLink Specialty Modules** selector table located in this section,

- 1. Locate the type of application.
- 2. Select a ZIPLink module.

Solution 6: ZIPLink Connector Modules to 3rd Party Devices

If you need a way to connect your device to terminal blocks without all that wiring time, then our pigtail cables with color-coded soldered-tip wires are a good solution. Used in conjunction with any compatible ZIPLink Connector Modules, a pigtail cable keeps wiring clean and easy and reduces troubleshooting time.

Using the **Universal Connector Modules and Pigtail Cables** table located in this section,

- 1. Select module type.
- 2. Select the number of pins.
- 3. Select cable.

Motor Controller Communication

AC Drive / Motor Controller (GS/DuraPulse) ZIPLink Selector
