IDEM Universal Gate Box

The IDEM Universal Gate Box features a type 4, high-coded RFID sensor, a robust mechanical locking function, and machine control functions in one heavy-duty housing.

These gate boxes can easily be fitted to access doors and offer optional rear release to reduce the risk of operators being trapped inside a hazardous area.

Users will benefit from the high flexibility of the safety gate system with 2- and 4-station models available, offering a wide variety of 22mm pilot device options.

UGB2-525002

UGB4-526001

Benefits

- Offers a high level of safety for both personnel and plant protection
- Highest protection against manipulation and defeat
- Suitable for left- or right-hinged gates
- Maximum flexibility thanks to the 2and 4-station models
- Reduced installation and maintenance costs

Features

- 90-degree fixed head
- 3000N holding force
- 24VDC to unlock
- Two NC safety outputs
- Two status outputs
- Two status LEDs
- IP65
- Optional sliding and rotary handles

• The pilot devices are sold separately and must be fitted by the end user.

• There is a terminal block inside the UGB-KLTM for connecting the safety circuit and lock functionality.

• Please note that the UGB boxes are shallow. Therefore, only IDEM 22mm pushbuttons are recommended.

IDEM Universal Gate Box Accessories

IDEM's gate bolts are engineered with rugged die-cast metal and steel construction and are capable of handling shearing forces of up to 10,000N (F1Max) for securing large, hinged doors.

These gate bolts are designed for ease of installation on hinged or sliding guards using four M6 mounting bolts, without requiring additional brackets or door handles.

They are also designed to be impervious to misalignment damage, ensuring long-lasting performance.

Operators must manually close the guard, eliminating the possibility of accidental closure.
