

The diagram illustrates the assembly of a terminal block. The main component is a blue terminal block with multiple rows of terminals. Various accessories are shown being added to it:

- Terminal Block:** The main assembly component.
- Separator:** A blue plate used to divide the terminal block into sections.
- Jumper Bar:** A grey bar used to connect multiple terminals.
- Top Cover Electric Symbol:** A grey cover with a lightning bolt symbol.
- Label Holder:** A grey holder for labels, shown with a label reading "0000-02 1".
- End Stop:** A grey component used to stop the terminal block from extending further.
- End Plate:** A blue plate used to cover the end of the terminal block.
- Marking Tag:** A grey tag with a "+" symbol used for marking.
- Comb-style Jumper:** A yellow comb-style jumper used for connecting terminals.

Red arrows indicate the placement of these components onto the terminal block. The terminal block itself has labels "461 462 463 464 465 466 467 468" and a "SECTION 1" label.

Multi-Pole Jumper Bars

Multi-pole jumper bars provide terminal block connection flexibility. Screw-down connection jumpers feature all-metal construction and can be installed quickly just by tightening the screws. Screwless comb-style jumpers are also available. See next page for the larger J1/O jumper installation instructions.
