Excelon® Plus 82 Series Air Filters - Particulate

Part No.
F82G-3AN-AD3

Part No.
F82G-3AN-QP3

Excelon Plus is the latest generation of Norgren Air Preparation equipment designed to meet the needs of today's customer. It offers exceptional performance, is compact, lightweight, robust and is suitable for most industrial applications.

The Excelon Plus 82 Series general purpose filter offers 40 micron particulate removal (5 micron sold separately), with water extraction levels of >95%. Maintenance of these units is quick and easy, as the filtration cartridge remains inside the bowl when it is removed. This filter maintenance system also means that the clearance needed below the unit for maintenance is a maximum of 25mm [1 in], reducing the space envelope needed on any machine.

Features

- Die-cast zinc or guarded polycarbonate filter bowl
- Air purity per ISO 8573-1 class 6&7 for particles and class 8 liquid water
- Unique double lock bowl design prevents bowl removal while the unit is pressurized, making Excelon Plus the safest filter on the market
- 40 micron particulate filter (5 micron filter sold separately)
- 1/4" and 3/8" PTF (FNPT - female NPT threaded ports)

Auto

Manual

See www.AutomationDirect.com for a wide variety of fitting options

Excelon® Plus 82 Series Air Filters - Coalescing Oil Removal

Part No.
F82C-3AD-AD0

Part No.
F82C-3AD-QP0

Excelon Plus is the latest generation of Norgren Air Preparation equipment designed to meet the needs of today's customer. It offers exceptional performance, is compact, lightweight, robust and is suitable for most industrial applications.

The Excelon Plus 82 series coalescing filter removes oil down to greater than 0.01mg/m³ - 0.01 micron particulate removal. The pleated element design means this can be achieved in a compact envelope, while still keeping pressure drop to a minimum. It is recommended to use a 5 micron particulate filter upstream to extend coalescing filter element life.

Features

- Die-cast zinc or guarded polycarbonate filter bowl
- 0.01 micron particulate removal
- Oil removal down to 0.01mg/m³
- Unique double lock bowl design prevents bowl removal while the unit is pressurized, making Excelon Plus the safest filter on the market
- Integrated pressure drop indicator changes color when service is needed
- 1/4" and 3/8" PTF (FNPT - female NPT threaded ports)

Excelon® Plus 82 Series Air Filters - Vapor Removal

Part No.
F82V-3AN-EDA

Part No.
F82V-3AN-EPA

Excelon Plus is the latest generation of Norgren Air Preparation equipment designed to meet the needs of today's customer. It offers exceptional performance, is compact, lightweight, robust and is suitable for most industrial applications.

The Excelon Plus 82 series carbon filter removes oil vapor (odor) from the compressed air supply (0.003 mg/m³ remaining oil). When used together, the coalescing and activated carbon filters ensure any compressed air system can be used for the most critical industrial automation applications, and deliver air purity to class 0 according to ISO 8573-1.

Features

- Die-cast zinc or guarded polycarbonate filter bowl
- Oil vapor (odor) removal down to 0.003 mg/m³
- 1/4" and 3/8" PTF (FNPT - female NPT threaded ports)

Excelon® Plus 84 Series Air Filters - Coalescing Oil Removal

Part No.
F84C-3AD-ADO

Part No.
F84C-3AD-AP0

Excelon Plus is the latest generation of Norgren Air Preparation equipment designed to meet the needs of today's customer. It offers exceptional performance, is compact, lightweight, robust and is suitable for most industrial applications.

The Excelon Plus 84 series coalescing filter removes oil down to greater than 0.01mg/m³ - 0.01 micron particulate removal. The pleated element design means this can be achieved in a compact envelope, while still keeping pressure drop to a minimum. It is recommended to use a 5 micron particulate filter upstream to extend coalescing filter element life.

Features

- Die-cast aluminum or guarded polycarbonate filter bowl
- 0.01 micron particulate removal (ISO 8573-1:2010 [1:7:2] with 5 micron pre-filter)
- Oil removal down to 0.01mg/m³
- Unique double lock bowl design prevents bowl removal while the unit is pressurized, making Excelon Plus the safest filter on the market
- Integrated pressure drop indicator changes color when service is needed
- 3/8", 1/2" and 3/4" PTF (FNPT - female NPT threaded ports)
