

# prosense® Digital Panel Meters - DPM1-P Series 1/32 DIN

These models in the ProSense DPM1-P series offer a simple, low cost digital display for frequency, tachometer, rate, and pulse width modulated (PWM) applications. The DPM1-P has a 4-digit 8mm character height red LED display, accepts input from AC voltage, magnetic sensors, NPN/PNP sensors, NAMUR sensors, TTL/24V encoders, or switched contacts, and provides selectable sensor excitation voltages. Two SPST relay outputs are included that can be set to activate on an increasing or decreasing input signal with hysteresis or time delay operation. These models also include a 0/4-20mA analog output. The meter

is powered from an external AC or DC power supply. The 1/32 DIN housing takes up minimal panel space and the meter face has an IP65 rating. Configuration parameters can be totally or selectively locked out to prevent unauthorized or accidental changes to the meter's operation. Other features include memory and reset of minimum and maximum display values, average measurement time setting to filter noisy input signals, and display brightness adjustment. ProSense digital panel meters are backed by a 3 year warranty.
