SCHMERSAL Heavy Duty Limit Switches

Cast Iron Limit Switches 250 Series

Overview

The Schmersal heavy duty cast iron limit switches offer a variety of actuator options, including side rotary levers with metal or plastic rollers, metal belt alignment rollers, or high-temperature models with metal rollers. They are IP65, IP66, and IP67 rated and have up to 2 conduit entries.

Belt alignment switches are actuated when the conveyor belt becomes misaligned. Depending on the plant arrangements, this signal can be used to switch the equipment off or to provide automatic correction of the belt alignment. The actuator arm contains a heavy duty roller and can be actuated to either side. Material handling applications often need special purpose switches for belt alignment. Many feature the heavy duty limit switch housings with uniquely designed actuators for these purposes.
