## Zyklop Speed Ratchet

### Small return angle

The fine 72-tooth ratchet mechanism has a low return angle of 5°. This short stroke allows fast and precise work in small spaces.

### Swivel ratchet head

The ratchet head pivots freely and locks at 0°, 15°, and 90°, making it possible to work in confined spaces with ample hand clearance.

### Simple direction change

Rotating the large thumbwheel quickly changes rotation from clockwise to counterclockwise from any position of the ratchet head.
