# Configuring Your KombiSIGN 71 Stack Light

#### STEP 1

Select the required optical elements for your application

#### STEP 2

Select the optional audible elements for your application

## STEP 3

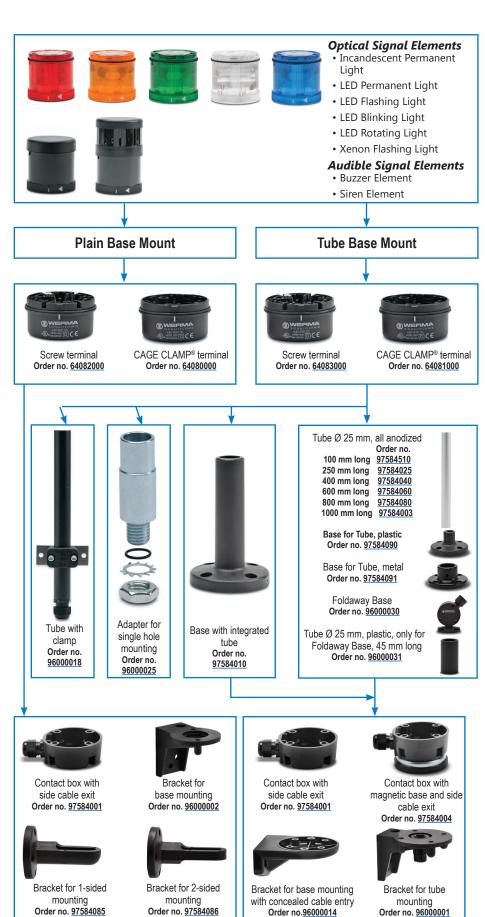

Select the correct terminal element for your mounting option (includes cap)

#### STEP 4

Where appropriate, select a base and the desired tube length (only for tube mounting)

### STEP 5

Where appropriate, select the bracket and the contact box.

# Werma Modular Stack Lights Overview

### **Description**

WERMA's modular stack light system offers total choice and flexibility as it allows for a completely free combination of optical and audible signal elements. The bayonet mechanism allows elements to be mechanically and electrically connected within seconds.

This means that elements can be safely and easily changed (contact-voltage proof) without the need for tools.

Typical product applications include; machine tools, packaging machines, conveyor systems, printing machines, loading docks, retail centers (check outs), queuing indicators for theme parks, and more.

### **Product highlights:**

- Signal elements in common voltages (24V DC and 115V AC)
- Modular system allows combination as required
- Two different sizes (70 and 50 mm diameter)
- Five colors available
- Wide range of audible elements
- Diverse and flexible solutions

### Simple assembly with bayonet mechanism

- Simple mounting and removal of the elements
- New combinations at the twist of a hand
- Tool-free bulb change
- · Position marks to guide alignment

# Werma Stack Lights Family Overview

### KombiSIGN 71

Modular IP65-rated stack light system with 70 mm diameter for use in standard applications.

KS 71 stack lights are available in 5 colors and multiple light effects (permanent, blinking, rotating, flashing). Multiple light sources (incandescent, LED, Xenon tube) and a wide variety of mountings are available. Combine up to 5 elements per terminal. Various terminal design choices are available as well as multiple voltages and audible elements up to 105 dB.

#### **KS 71 Terminal Elements**

Screw terminals

CAGE CLAMP® terminals

Modular IP54-rated stack light system with 50 mm diameter for use on smaller machines.

KombiSIGN 50

KS 50 stack lights are available in 5 colors with either permanent or blinking light effects in multiple voltages. A choice of incandescent or LED light sources is available as well as an 80 dB audible element. Elements can be combined in a variety of mountings, up to 4 elements per mounting for 360° of visibility.

Screw terminal

## Safe and Efficient Connection Thanks to CAGE CLAMP Technology

Terminal elements with CAGE CLAMP® technology enable leads to be quickly and easily wired, guaranteeing a secure and reliable contact.

Insert screwdriver at a slight angle into opening as far as possible.

Open spring-loaded clamp with the help of the screwdriver and insert wire as far as possible.

Remove screwdriver - the wire is firmly clamped.

CAGE CLAMP is a registered trademark of WAGO Kotakttechnik GmbH.
