

wiha Wrenches

Tools that work for you

Wing and Flag Handle Sets

Wiha wing and flag handles are built for high torque transfer with small screws. The flag handles have a molded flag and a top grip knob to allow for rapid spinning of the driver. The screwdriver blades are made of premium quality tool steel for strength and durability and are through hardened for best wear resistance and have a black coating for corrosion resistance. Wiha's exact-fit Torx tips eliminate excessive bit wobble for increased driver accuracy. The result is a highly stable engagement with the screw head and a reduction in fastener cam-out that can lead to injury or damage to finished materials.

Features

- TORX Plus Wing/Flag style handle with spinner top
- Exact fit machined tips
- Blades of high performance CRM 72 tool steel
- Handles are molded on for permanent bond
- Meets EN/IEC 60900 testing standards for protection against arc flash explosion
- Meets ASTM F1505 standard specifications for insulated and insulating hand tools
