Module Installation

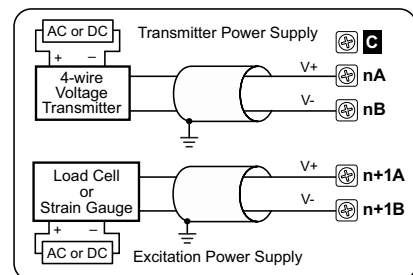

Dimensional Information

Thermocouple and Voltage Source Wiring

NOTE: Thermocouple extension wire and proper thermocouple terminal blocks must be used to extend thermocouples. AutomationDirect thermocouple wire is recommended.

NOTE: Shield should be connected only at one end, to ground at the source device. For maximum accuracy, Jumper unused inputs.

RTD/Thermistor Wiring

Mixed Resistive and Thermocouple Wiring

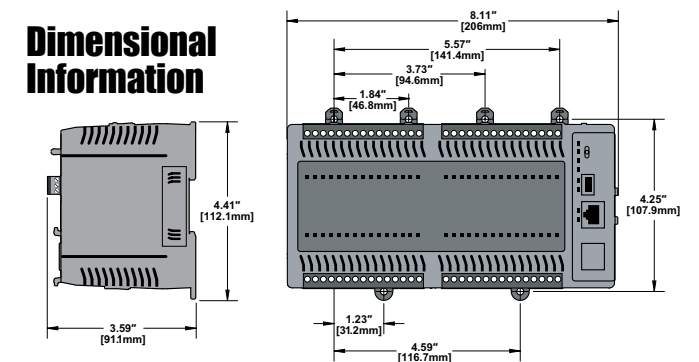

Notes for maximum accuracy:

- All wires to an RTD must be equal length and type. Refer to RTD manufacturer's recommendations.
- Do not use cable shield as sensing wire.
- When applicable, connect shield to RTD common only, otherwise connect to module common only. Do not connect shield to both ends.
- Jumper unused inputs.
