**Warning:** Do NOT use EZTouch RAM or Flash memory cards with the C-more touch panels.
## Accessories Overview

**NOTE**: CompactFlash memory card designations – CF Slot #1 is at the top of the panel and CF Slot #2 is the CF Card Interface Module, EA-CF-IF.

**NOTE**: Refer to the individual product data sheets that are included with the accessories for additional information.
Chapter 3: Accessories

Accessories at a glance:

- AC/DC Power Adapter: EA-AC
- CF Card Interface Module: EA-CF-IF
- Expansion Assembly: EA-EXP-OPT
- CompactFlash Memory Card: EA-CF-CARD
- 6 inch Adapter Plate: EA-6-ADPTR
  (Used to retrofit new C-more 6” touch panel into existing EZTouch non-slim panel cutout.)
- D-SUB 15 pin 90 degree Comm Port Adapter: EA-ADPTR-4
- D-SUB 15 pin to Terminal Block Adapter: EA-COMCON-3
- Non glare 15 inch screen cover: EA-15-COV2
  (pk of 3)
- Non glare 12 inch screen cover: EA-12-COV2
  (pk of 3)
- Non glare 10 inch screen cover: EA-10-COV2
  (pk of 3)
- Non glare 8 inch screen cover: EA-8-COV2
  (pk of 3)
- Non glare 6 inch screen cover: EA-6-COV2
  (pk of 3)

WARNING

To minimize the risk of potential safety problems, you should follow all applicable local and national codes that regulate the installation and operation of your equipment. These codes vary from area to area and it is your responsibility to determine which codes should be followed, and to verify that the equipment, installation, and operation are in compliance with the latest revision of these codes.

Equipment damage or serious injury to personnel can result from the failure to follow all applicable codes and standards. We do not guarantee the products described in this publication are suitable for your particular application, nor do we assume any responsibility for your product design, installation, or operation.

If you have any questions concerning the installation or operation of this equipment, or if you need additional information, please call us at 770-844-4200.

This publication is based on information that was available at the time it was printed. At Automationdirect.com® we constantly strive to improve our products and services, so we reserve the right to make changes to the products and/or publications at any time without notice and without obligation. This publication may also discuss features that may not be available in certain revisions of the product.
AC/DC Power Adapter

The optional *C-more* AC/DC Power Adapter can be used to power the *C-more* touch panels from a 100-240 VAC, 50/60 Hertz, voltage source. The adapter provides 24 VDC @ 1.5 A to the touch panel’s DC power connector and can be conveniently secured to the touch panel with two captive screws. The adapter provides a power loss signal to the touch panel that can be used to track power outages. This signal also allows the touch panel by way of a timed sequence to stop writing data to CompactFlash memory devices providing a controlled shutdown for increased data logging reliability.

**Warning:** The AC/DC Power Adapter is not recommended for use with the EA7-T15C touch panel when operating temperatures are expected to exceed 40 °C [104 °F].

**NOTE:**
1. The AC/DC Power Adapter, EA-AC, is for *C-more* touch panels only, and is powered from a 100-240 VAC, 50/60 Hertz power source. The adapter provides 24 VDC @ 1.5 A.
2. Power Fault features help protect data being logged to CompactFlash during power failures. The *C-more* panel must have firmware version 1.21 Build 6.18E or higher for proper operation.

**NOTE:** Permissible momentary power failure: The **C-more** touch panel will turn off the LCD backlight instantly when the power failure is detected (less than 58 VAC +/- 5%) for extending the Power Retention Period that enables the CPU to run longer. The backlight turns on automatically when the power returns to the **C-more** operating voltage.

AC/DC Power Adapter Installation

**Warning:** This procedure should only be performed by qualified personnel who are experienced in working with electronic equipment. Take the necessary steps to prevent damage that may be caused by static electricity discharge. Disconnect input power to the touch panel before proceeding.

1. **Preparation:** Place the touch panel face down on a lint-free soft surface to prevent scratching the display screen if not already installed in a control cabinet. Remove the DC power connector if it is installed.

2. Insert the AC/DC Power Adapter into the touch panel’s 5-position DC power connector.

3. Secure the AC/DC Power Adapter to the touch panel by tightening the two (2) spring loaded captive M3-20 screws to a torque of 50 oz-in [0.35 Nm].

4. Plug the wired 3-pin AC Power Connector into its mating connector on the adapter and secure in place by tightening the two (2) captive M2.5 screws to a torque of 70 oz-in [0.5 Nm]. (Wiring details shown on page 3-5.)
Expansion Assembly

The *C-more* Expansion Assembly is used to allow installation of the optional CF Card Interface Module for CF card use and also provides a slot for future option modules.

**Expansion Assembly Details**

![Expansion Assembly Details Image]
Expansion Assembly Installation

**WARNING:** This procedure should only be performed by qualified personnel who are experienced in working with electronic equipment. Disconnect input power to the touch panel before proceeding.

1. Preparation: Place the touch panel face down on a lint-free soft surface to prevent scratching the display screen if not already installed in a control cabinet.

2. Remove expansion area cover by pressing down on the left and right line markings and at the same time, slide the cover in the direction of the embossed arrow.

3. The cover will stop at the “Remove” position indicated by a tic mark on the cover lining up with the “Remove” tic mark on the panel. At this position, lift the cover up.

4. Position the expansion assembly over the opening so that the tic mark to the right of the fastening screw lines up with the “Remove” tic mark.
Expansion Assembly Installation (cont’d)

5. Note: The Expansion Assembly is shown in the photos with two covers. The unit is shipped with only one cover in place.

Slide the expansion assembly in a downward direction until the tic marks at the home position line up.

6. Secure the Expansion Assembly to the touch panel by tightening the spring loaded captive M3-20 screw to a torque of 50 oz-in [0.35 Nm].
Chapter 3: Accessories

CF Card Interface Module

The C-more CF Card Interface Module is used with the Expansion Assembly to allow use of CompactFlash™ cards, such as the CompactFlash Memory, EA-CF-CARD.

**Part No. EA-CF-IF**

CF Card Interface Module Dimensions

Units: inches [mm]
CF Card Interface Module Installation

**WARNING:** The CF Card Interface Module is designed to be installed in the right hand side slot of the Expansion Assembly only. This procedure should only be performed by qualified personnel who are experienced in working with electronic equipment. Take the necessary steps to prevent damage that may be caused by static electricity discharge. Disconnect input power to the touch panel before proceeding.

1. **Preparation:** Place the touch panel face down on a lint-free soft surface to prevent scratching the display screen if not already installed in a control cabinet. Again, make sure the input power is disconnected. Remove the right hand side protective slot cover, if it is installed, by squeezing the pinch tabs and lifting the cover off.

2. Install the CF Card Interface Module, p/n EA-CF-IF, into the right hand side slot by carefully aligning the female connector of the interface module with the male connector on the touch panel. There are PCB guides at the top and bottom of the slot to accept the edge of the Interface Module’s printed circuit board. It is also helpful to preset the locking tabs of the Interface Module so they are swung inward, top and bottom.

3. Continue to slide the interface module into the slot until the front of the module is flush with the front of the Expansion Assembly. Press on the front of the Interface Module until the locking tabs snap into place.

4. The above photo shows the CF Card Interface Module fully installed. To remove the Interface Module in the future, pry out on the top and bottom locking tabs at the same time and the module will release from the connector. Lift the module from the slot. The Interface Module should only be removed from the slot with input power disconnected.
Chapter 3: Accessories

CompactFlash Memory

EA-CF-CARD is a high speed industrial grade CompactFlash™ memory card for non-volatile storage. Its 85 °C operating temperature makes it perfect for data logging in industrial applications (recommended for C-more touch panels).

Part No. EA-CF-CARD

Specifications/Features:
- CompactFlash™ Compatibility
- W/E Endurance: 100,000 cycles
- Data transfer rate: 16MB/second
- Operating Temp: -13° to 185° F (-25° to 85° C)
- Operating Humidity: 85% max, non-condensing
- Storage Temp: -13° to 194° F (-25° to 90° C)
- Storage Humidity: 95% max, non-condensing

CF Slot #1 Location

CF Slot #2 Location
CompactFlash Memory Card Installation

**Warning:** Take the necessary steps to prevent damage that may be caused by static electricity discharge. Disconnect input power to the touch panel before proceeding.

**Preparation:** If the touch panel is not already installed into a control cabinet, then in a clean environment, place the panel face down on a lint-free soft surface to prevent scratching the front of the panel.

**CF Card Installed in CF Slot #1:**

1. Remove the protective dust cover from the CF Slot #1 at the top of the touch panel by prying up on one edge. Discard the dust cover or store it for future use when a CF card is not being used.

2. Orientate the CompactFlash memory card so that the front label is facing the back of the panel and the CF card connector faces into the slot. There are guides on each side of the slot that will match the guides on the CF card. The CF card can only be inserted one way.

3. Gently press the CF card into the slot until it stops. You should feel a slight resistance as the CF card connector mates with the slot's connector. The CF card should be flush with the slot's opening. The dust cover can then be re-installed.

4. To remove the CF card from the CF Slot #1, press in on the eject button to the right of the CF card. This will cause the CF card to be partially ejected from the slot allowing removal.

**Warning:** Do NOT use EZTouch RAM or Flash memory cards with the C-more touch panels.
CompactFlash Memory Card Installation (cont’d)

Preparation: Disconnect input power and all other connections, then remove the touch panel from the control cabinet. In a clean environment, place the panel face down on a lint-free soft surface to prevent scratching the front of the panel.

1. Orientate the CompactFlash memory card so that the front label is facing the power supply connector and the CF card connector faces into the slot. There are guides on each side of the slot that will match the guides on the CF card. The CF card can only be inserted one way.

2. Gently press the CF card into the slot until it stops. You should feel a slight resistance as the CF card connector mates with the slot’s connector. The CF card should be flush with the slot’s opening.

3. To remove the CF card from the CF Slot #2, press in on the eject button at the bottom of the CF card. This will cause the CF card to be partially ejected from the slot allowing removal.

WARNING: Do NOT use EZTouch RAM or Flash memory cards with the C-more touch panels.
6” Adapter Plate

The adapter plate has been designed to simplify the retrofit of a new *C-more* 6” touch panel into an existing cabinet cutout for an *EZTouch* 6” non-slim touch panel, such as *AutomationDirect* part number EZ-S6C-K, EZ-S6C-F, EZ-S6M-R or EZ-S6M-F. The new *C-more* 6” touch panel will directly mount into the existing cutout opening for any *EZTouch* 6” slim touch panel.

---

6” Adapter Plate Installation

The adapter plate has been designed to simplify the retrofit of a new C-more 6” touch panel into an existing cabinet cutout for an EZTouch 6” non-slim touch panel, such as our part number EZ-S6C-K, EZ-S6C-F, EZ-S6M-R or EZ-S6M-F. The new C-more 6” touch panel will directly mount into the existing cutout opening for any EZTouch 6” slim touch panel.

Two sets of mounting screws are provided with the adapter plate. Set A contains six M4 metric screws by 8mm in length for a control cabinet thickness range of 0.02-0.118” [0.5-3mm]. Set B contains six M4 metric screws by 10mm in length for a control cabinet thickness range of 0.118-0.197” [3-5mm]. Mounting screw torque: 100 oz-in [0.7 Nm].

The two DIN mounting clips that secure the C-more 6” touch panel to the adapter plate are provided with the touch panel. The adapter plate has an integral sealing gasket and the touch panel includes a gasket to seal the panel to the adapter.

Use of the adapter plate will maintain the NEMA 4/4X (indoor) rating of the C-more touch panel.

Dimensions for the cutout with mounting hole locations and an assembly diagram are shown in this chapter.

Preparation: Confirm the existing cutout with the dimensions shown on the previous page when using the adapter plate to replace an existing EZTouch 6” non-slim touch panel with a new C-more 6” touch panel.

**WARNING:** Mount the adapter plate and touch panel on a vertical surface to allow proper cooling.

Chapter 3: Accessories

Non-glare Screen Covers

Non Glare 6 Inch Screen Cover, protective overlay used to protect the touch screen while helping to reduce the glare from external light sources. (pk of 3)

Part No. EA-6-COV2, EA-8-COV2, EA-10-COV2, EA-12-COV2 & EA-15-COV2

Screen Cover Dimensions

Units: inches [mm]
Non-glare Screen Covers (cont’d)

Clear Screen Overlay Installation

Step 1

Check to be sure that the proper size non-glare screen cover is being used on the subject touch panel. Notice that the outer perimeter of the screen cover has an adhesive band. The adhesive band will be located on the outside edge of the touch panel’s white frame bordering the touch area when installed.

Step 2

Start in one corner and peel the screen cover from the backing.

Step 3

Align the screen cover over the touch panel’s white frame, then start on one side and gently lay the cover over the entire touch area.

Step 4

Smooth out the screen cover and press all around the outside perimeter to secure the cover in place. The screen cover can be removed by lifting up on the small tab and gently pulling the cover away from the touch panel’s surface.

Step 5

Remove the protective sheet.

NOTE: The protective cover ships with a thin protective sheet on the face of the cover that needs to be carefully removed. If your panel is not clear, the protective sheet may not have been removed.
