

Assembly instructions

Every chain bracket set includes these parts.

The RS-ZL are always delivered assembled with the ZLA. As can be seen in the first picture.

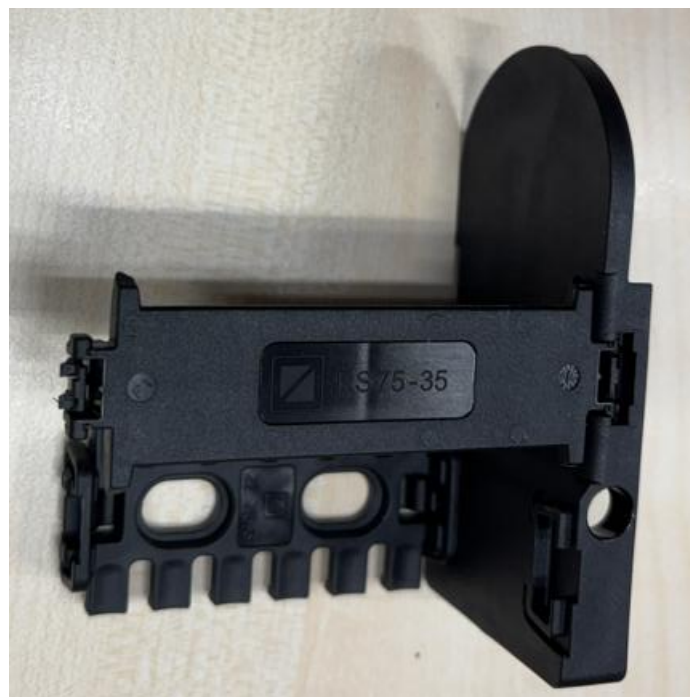

In the first assembly step, the RS-ZL is clipped into the chain bracket

Then the frame bridge is mounted.

Now the second side of the chain connection can be assembled.

Now the chain bracket can be flipped over and the missing frame bridge can be mounted on the other side.

These assembly instructions can be used for chain variants MP35.1/.2 and MP 45.1/.2.
