Physical Specifications

Weight	8 ounces
Panel Fasteners	Four 6x32 threaded studs
LED Display	4 line x 20 character STN with LED backlight; 4.75mm high x 2.95mm wide character size
NEMA Rating	NEMA 4 (when properly installed)

Environmental Specifications

Operating Temperature	32°F to 122°F (0°C to 50°C)
Storage Temperature	–4°F to 158°F (–20°C to 70°C)
Operating Humidity	95% (non-condensing)
Air Composition	No corrosive gases permitted

Operating Specifications

|	
Power Consumption	0.75W @ 5 VDC (Power On surge of 0.44A for 1 ms)
Power Connector	Three terminal DC power plug, center negative
Power Supply	+5 VDC external power supply required for configuration on all panels; required for operation on all PLCs **except** DL05, DL105, DL205, and DL405
Minimum/Maximum Supply Voltage	+5 VDC only
Diagnostics	LED Status
Communication Link	RS-232 4800 to19200 baud 6-pin RJ12 phone jack type connector

Power Supply Connections

OP400 series panels require +5 VDC input power. An optional 5 VDC external power supply that plugs into a standard 120 VAC receptacle is available (part no. OP–PS400). This power supply (or equivalent) is required for configuring your panel. The power supply is also required for operation **unless** you are using a DL05, DL105, DL205 or DL405 PLC (these products supply 5VDC through the communications cable). All other PLCs, including DL305 and Allen-Bradley 5/03, 5/04 and Micrologix, require the use of an external 5VDC power supply during operation.
**NOTE:** Only use a 5 VDC power supply that has a **center negative** DC power jack.

Configuration: 5 VDC Power Supply Required For **All** 400 series panels

Connecting the Configuration Cable

**Configuration
Cable**

You will need two cables to use your OP-panel: A configuration cable (part number
OP–CCBL) and a communications cable. Connect the configuration cable between
the serial port on the rear of the OP-panel and the serial port of the personal
computer. The panel may then be configured using the OP–WINEDIT configuration
software. The figure below shows configuration cable connectors and wiring
specifications. The wiring diagram refers to the cable connectors, *not* the
communication ports. This cable is disconnected after configuration.

Selecting a Communications Cable

After configuration, connect the communications cable between the OP-panel and the PLC. Use the following table to select the proper communications cable.

Cables for OP400 Series OptiMate Panel-to-PLC Connections			
Family	**CPU (or other device)**	**Port**	**Cable**
*Direct*LOGIC™ DL05	D0–05xx	Ports 1 and 2	OP–2CBL–2
