Module Installation

WARNING: Do not add or remove modules with field power applied.

Step One: With latch in "locked" position, align connectors on the side of each module and stack by pressing together. Click indicates lock is engaged.

Check all latches are secure after modules are connected.

Step Two: Attach field wiring using the removable terminal block or ZIPLink wiring system.

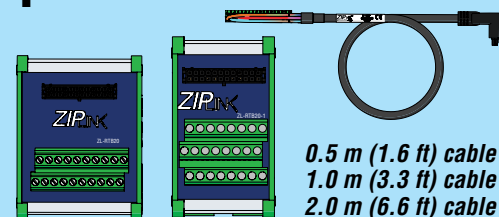

Step Three: To unstack modules, pull locking latch up into the unlocked position and then pull modules apart.
