Transmitter supply unit With limit contact

Ex i field circuit

9162/13-11-14s Art. No. 238251

- Compact limit value switch with 2 configurable limiting values and 4 ... 20 mA output
- Suitable for 2-, 3-wire transmitter, 2-wire HART transmitter and mA-sources
- Intrinsically safe input [Ex ia] IIC
- Open-circuit and short-circuit monitoring and messaging
- For use up to SIL 2 (IEC 61508)

MY R. STAHL 9162A

9162 series Ex i transmitter power supply units with limit values can be used for the intrinsically safe operation of two- and three-conductor transmitters or for connecting to intrinsically safe mA sources. Two limit values can be easily set using the "ISpac Config" software. If the value exceeds or falls below these limit values, these units will issue an alert. A wire-breakage and short-circuit monitoring system provides increased availability.
