

SureStep™ STEPPING MOTORS

Bipolar Step Motors:

STP-MTRL-14026(x), 14034(x)
 STP-MTR-17040(x), 17048(x), 17060(x), 23055(x),
 23079(x), 34066(x)
 STP-MTRH-23079(x), 34066(x), 34097(x), 34127(x)

Motor Extension Cables:

STP-EXT-0xx, STP-EXTH-0xx, STP-EXTL-0xx

STP-MTR-xxxxxE
(encoder mount)

STP-MTR-xxxxxD
(dual-shaft)

STP-MTR-xxxxxW
(IP65)

STP-MTR-xxxxx
(single-shaft)

Note: SureStep™ motors are all connectorized four lead bipolar step motors.

WARNING

To minimize the risk of potential safety problems, you should follow all applicable local and national codes that regulate the installation and operation of your equipment. These codes vary from area to area. It is your responsibility to determine which codes should be followed, and to verify that the equipment, installation, and operation are in compliance with the latest revision of these codes.

Equipment damage or serious injury to personnel can result from the failure to follow all applicable codes and standards. We do not guarantee the products described in this publication are suitable for your particular application, nor do we assume any responsibility for your product design, installation, or operation.

If you have any questions concerning the installation or operation of this equipment, or if you need additional information, please call our technical support group at 770-844-4200.

This publication is based on information that was available at the time it was printed. At AutomationDirect.com® we constantly strive to improve our products and services, so we reserve the right to make changes to the products and/or publications at any time without notice and without obligation. This publication may also discuss features that may not be available in certain revisions of the product.

1) The combinations above will perform according to the published speed/torque curves. However, any STP motor can be used with any STP drive. Using a motor with a current rating higher than the drive's output rating will proportionally limit the motor torque.

2) MTR motors have connectors compatible with the EXT extension cables.
 MTRH motors have connectors compatible with the EXTH extension cables.
 MTRL motors have connectors compatible with the EXTL extension cables.
 W-series motors have connectors compatible with the EXTW and EXTHW extension cables.

Connecting the Motor

WARNING: When connecting a step motor to a drive or indexer, be sure that the motor power supply is switched off. Never disconnect the motor while the drive is powered up. Never connect the motor leads to ground or directly to the power supply. (See the Typical Wiring Diagram for the step motor lead color code of AUTOMATIONDIRECT supplied motors.)

Mounting the Motor

We recommend mounting the motor to a metallic surface to help dissipate heat generated by the motor. The motor can be mounted in any orientation (horizontal or vertical).

Torque vs Speed Curves

The torque vs speed curves are published in the SureStep User Manual, which is available for free download from our website.

Design and Installation Tips

Allow sufficient time to accelerate the load and size the step motor with a 100% torque safety factor. DO NOT disassemble step motors because motor performance will be reduced and the warranty will be voided. DO NOT connect or disconnect the step motor during operation. Mount the motor to a surface with good thermal conductivity, such as steel or aluminum, to allow heat dissipation. Use a flexible coupling with "clamp-on" connections to both the motor shaft and the load shaft to prevent radial and thrust loading on bearings from minor misalignment.

STP-MTRx-xxxx Typical Dimension Diagram

Note: See table on next page for dimension values

** Dimension H2 applies only to dual-shaft (D) and encoder (E) motors.
Dimension D is the same for both front and rear shafts of dual-shaft and encoder motors.
Dimensions J & K do NOT apply to rear shafts of dual-shaft and encoder motors (all rear shafts are round style).
