**WARNING!**

This device is designed for connection to hazardous electric voltages. Ignoring this warning can result in severe personal injury or mechanical damage. To avoid the risk of electric shock and fire, the safety instructions of this manual must be observed and the guidelines followed. The specifications must not be exceeded, and the device must only be applied as described in the following. Prior to the commissioning of the device, this manual must be examined carefully.

Only qualified personnel (technicians) should install this device. If the equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.

**WARNING!**

Until the device is fixed, do not connect hazardous voltages to the device. The following operations should only be carried out on a disconnected device and under ESD safe conditions:

- General mounting, connection and disconnection of wires
- Troubleshooting the device

**Repair of the device and replacement of circuit breakers** must be done by Morsettitalia S.p.A. only.

**WARNING**

884114 must be mounted on a DIN rail according to DIN 46277.

**WARNING**

Do not open the front plate of the module as this will cause damage to the connector for the display / programming front 884501. This module contains no DIP-switches or jumpers.

**SYMBOL IDENTIFICATION**

- **Triangle with an exclamation mark:** Warning / demand. Potentially lethal situations.
- **The CE mark** proves the compliance of the device with the essential requirements of the directives.
- **The double insulation symbol** shows that the device is protected by double or reinforced insulation.

**SAFETY INSTRUCTIONS**

**DEFINITIONS:**

Hazardous voltages have been defined as the ranges: 75 to 1500 Volt DC, and 50 to 1000 Volt AC.

Technicians are qualified persons educated or trained to mount, operate, and also troubleshoot technically correct and in accordance with safety regulations.

Operators, being familiar with the contents of this manual, adjust and operate the knobs or potentiometers during normal operation.

**RECEIPT AND UNPACKING:**

Unpack the module without damaging it. The packing should always follow the module until this has been permanently mounted. Check at the receipt of the module whether the type corresponds to the one ordered.

**ENVIRONMENT:**

Avoid direct sunlight, dust, high temperatures, mechanical vibrations and shock, as well as rain and heavy moisture. If necessary, heating in excess of the stated limits for ambient temperatures should be avoided by way of ventilation. All devices fall under Installation Category II, Pollution Degree 1, and Insulation Class II.

**MOUNTING:**

Only technicians who are familiar with the technical terms, warnings, and instructions in the manual and who are able to follow these should connect the device. Should there be any doubt as to the correct handling of the device, please contact your local distributor or, alternatively,
Mounting and connection of the device should comply with national legislation for mounting of electric materials, i.e. wire cross section, protective fuse, and location. Descriptions of input / output and supply connections are shown in the block diagram and side label.

The following apply to fixed hazardous voltages-connected devices:
The max. size of the protective fuse is 10 A and, together with a power switch, it should be easily accessible and close to the device. The power switch should be marked with a label indicating that it will switch off the voltage to the device.

Year of manufacture can be taken from the first two digits in the serial number.

**UL INSTALLATION REQUIREMENTS:**
Use 60/75°C copper conductors only
For use only in pollution degree 2 or better
Max. ambient temperature......................... 60°C
Max. wire size........................................ AWG 26-14

**CALIBRATION AND ADJUSTMENT:**
During calibration and adjustment, the measuring and connection of external voltages must be carried out according to the specifications of this manual. The technician must use tools and instruments that are safe to use.

**NORMAL OPERATION:**
Operators are only allowed to adjust and operate devices that are safely fixed in panels, etc., thus avoiding the danger of personal injury and damage. This means there is no electrical shock hazard, and the device is easily accessible.

**CLEANING:**
When disconnected, the device may be cleaned with a cloth moistened with distilled water.

**LIABILITY:**
To the extent that the instructions in this manual are not strictly observed, the customer cannot advance a demand against Morsettitalia S.p.A. that would otherwise exist according to the concluded sales agreement.

---

**EC DECLARATION OF CONFORMITY**

As manufacturer

Morsettitalia S.p.A.
Via Santi, 87
I - 20037 Paderno Dugnano (MI)

hereby declares that the following product:

Type: 884114
Name: Universal transmitter

is in conformity with the following directives and standards:
The EMC Directive 2004/108/EC and later amendments
EN 61326-1

For specification of the acceptable EMC performance level, refer to the electrical specifications for the module.
The Low Voltage Directive 2006/95/EC and later amendments
EN 61010-1

Rønde, 20 August 2009

HOW TO DEMOUNT 884114

First, remember to demount the connectors with hazardous voltages.

**Picture 1:**
Detach the device from the DIN rail by lifting the bottom lock.

**When front LED lights red / display shows AO.ER:**

884114 is designed as a SIL 2 device with a high safety level. Therefore, a continuous measurement of the outgoing current is carried out on a 4...20 mA output signal. If the current is 0, an error mode switches on the red front LED. This function is not a default option but must be actively selected in the menu. The error mode can only be reset by switching off and then switching on the supply voltage to the device.

UNIVERSAL TRANSMITTER

884114

- *Input for RTD, TC, Ohm, potentiometer, mA and V*
- *2-wire supply > 16 V*
- *Output for current and voltage*
- *Universal AC or DC supply*

**Advanced features:**
- Programmable by way of detachable display front (884501), process calibration, signal simulation, password protection, error diagnostics and help text available in several languages.

**Application:**
- Linearised, electronic temperature measurement with RTD or TC sensor.
- Conversion of linear resistance variation to a standard analogue current / voltage signal, i.e. from solenoids and butterfly valves or linear movements with attached potentiometer.
- Power supply and signal isolator for 2-wire transmitters.
- Process control with standard analogue output.
- Galvanic separation of analogue signals and measurement of floating signals.
- The 884114 is designed according to strict safety requirements and is thus suitable for application in SIL 2 installations.

**Technical characteristics:**
- When 884114 is used in combination with the 884501 display / programming front, all operational parameters can be modified to suit any application. As the 884114 is designed with electronic hardware switches, it is not necessary to open the device for setting of DIP-switches.
- A green / red front LED indicates normal operation and malfunction.
- Continuous check of vital stored data for safety reasons.
- 3-port 2.3 kVAC galvanic isolation.
**884501 DISPLAY / PROGRAMMING FRONT**

**Functionality:**
The simple and easily understandable PReasy menu structure and the explanatory help texts guide you effortlessly and automatically through the configuration steps, thus making the product very easy to use. Functions and configuration options are described in the section "Configuration / operating the function keys".

**Application:**
- Communications interface for modification of operational parameters in 884114.
- Can be moved from one 884114 device to another and download the configuration of the first transmitter to subsequent transmitters.
- Fixed display for readout of process data and status.

**Technical characteristics:**
- LCD display with 4 lines; Line 1 (H=5.57 mm) shows input signal, line 2 (H=3.33 mm) shows units, line 3 (H=3.33 mm) shows analogue output or tag no. and line 4 shows communication status.
- Programming access can be blocked by assigning a password. The password is saved in the transmitter in order to ensure a high degree of protection against unauthorised modifications to the configuration.

**Mounting / installation:**
- Click 884501 onto the front of 884114.

---

**APPLICATIONS**

**Input signals:**
- Current
- Voltage
- Potentiometer
- RTD and lin. R
- TC Connect., wires

**Output signals:**
- Analogue, 0/4...20 mA and voltage

**Supply:**
- 21.6...253 VAC
- 19.2...300 VDC

* Order separately for external CJC: 885910 CJC connector. See the connection drawing on page 39.

2) The error is reset by switching off and then switching on the supply voltage to the device.
**CONFIGURATION / OPERATING THE FUNCTION KEYS**

Documentation for routing diagram.

**In general:**

When configuring the 884114, you will be guided through all parameters and you can choose the settings which fit the application. For each menu there is a scrolling help text which is automatically shown in line 3 on the display.

Configuration is carried out by using the 3 function keys:

- will increase the numerical value or choose the next parameter
- will decrease the numerical value or choose the previous parameter
- will accept the chosen value and proceed to the next menu

When configuration is completed, the display will return to the default state 1.0.

Pressing and holding will return to the previous menu or return to the default state (1.0) without saving the changed values or parameters.

If no key is activated for 1 minute, the display will return to the default state (1.0) without saving the changed values or parameters.

**Further explanations:**

**Password protection:** Programming access can be blocked by assigning a password. The password is saved in the transmitter in order to ensure a high degree of protection against unauthorised modifications to the configuration. Default password 2008 allows access to all configuration menus.
Signal and sensor error info via display front 884501

Sensor error (see limits in the table) is displayed as SE.BR (sensor break) or SE.SH (sensor short). Signals outside the selected range (not sensor error, see table for limits) are displayed as IN.LO indicating low input signal or IN.HI indicating high input signal. The error indication is displayed in line 3 as text and at the same time the backlight flashes. Line 4 of the display is a status line which displays COM (flashing bullet) indicating correct functioning of 884501, and arrow up/down which indicates tendency readout of the input signal.

Signal and sensor error indication without display front

Status of the unit can also be read from the red/green LED in the front of the device.
- Green flashing LED 13 Hz indicates normal operation.
- Green flashing LED 1 Hz indicates sensor error.
- Steady green LED indicates internal error.
- Steady red LED indicates fatal error.

Advanced functions

The unit gives access to a number of advanced functions which can be reached by answering “Yes” to the point “adv.set”.

Display setup: Here you can adjust the brightness contrast and the backlight. Setup of TAG number with 6 alphanumerics. Selection of functional readout in line 3 of the display - choose between readout of analogue output or TAG number.

Two-point process calibration: The unit can be process-calibrated in 2 points to fit a given input signal. A low input signal (not necessarily 0%) is applied and the actual value is entered. Then a high signal (not necessarily 100%) is applied and the actual value is entered. If you accept to use the calibration, the unit will work according to this new adjustment. If you later reject this menu point or choose another type of input signal the unit will return to factory calibration.

Process simulation function: If you say “yes” to the point “EN.SIM” it is possible to simulate an input signal by means of the arrow keys and thus control the output signal up or down. When you finalise the point with \( \infty \), the unit returns to normal mode.

Password: Here you can choose a password between 0000 and 9999 in order to protect the unit against unauthorised modifications to the configuration. The unit is delivered default without password. If you have locked the unit with a password by mistake, you can always open the menu by using the master password 2008.

Language: In the menu “lang.setup” you can choose between 7 different language versions of help texts that will appear in the menu. You can choose between UK, DE, FR, IT, ES, SE and DK.

Auto diagnosis

The unit performs an advanced auto diagnosis of the internal circuits.
- The following possible errors can by display in the front unit 884501.
  - CJ.ER - CJC sensor defect or CJC temperature outside range
  - FL.ER - Flash error
  - AO.ER - No load on the current output (only for 4...20 mA)
  - NO.CO - Connection error
  - IN.ER - Error levels on input
  - TY.ER - Configuration in 884501 does not match this product type

Selection of units

After choosing the input signal type you can choose the process units which will be displayed in text line 2 (see table). By selection of temperature input the process value is always displayed in Celsius or Fahrenheit. This is selected in the menu point after selection of temperature input.

Safety readback

When the device is delivered with default configuration, the SIL function is disabled. The safety readback function (loop surveillance) can be selected in the menu O.RANGE, thus enabling the device to run in SIL mode. In order to enable the SIL functionality, the menu item S4...20 mA must be selected. Please note, however, that when safety readback is enabled, a sensor error will be indicated as an error on the analogue output signal.

CJC

In the CJC menu you can choose between CJC connector and internal cold junction compensation. The CJC connector (885910) must be ordered separately.
Routing diagram

If no key is activated for 1 minute, the display will return to the default state 1.0 without saving configuration changes.

增加值 / 选择下一个参数
降低值 / 选择上一个参数
接受选择的值并转到下一个菜单

Hold Back to previous menu / return to menu 1.0 without saving

1.0 = Default state
Line 1 shows input signal.
Line 2 shows UNIT.
By pressing < and > simultaneously line 3 alternates between R NXT and TAG.
Line 4 shows communication status.
1.1 = Only if password-protected.
1.2 = Not valid for these input signals: 0...20 mA and voltage.
1.3 = Only if input signal is temperature.

To default state 1.0

[08] Select Celsius as temperature unit
Select Fahrenheit as temperature unit
[09] Select TC sensor type
Select Pt sensor type
[10] Select display unit
Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[11] Set display range low
Set display range high
[12] Select decimal point position
[13] Set display range low
Set display range high
Select P10 as sensor type
Select P20 as sensor type
Select P50 as sensor type
Select P100 as sensor type
Select P200 as sensor type
Select P500 as sensor type
Select P1000 as sensor type
[14] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[15] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[16] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[17] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[18] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[19] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[20] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[21] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[22] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[23] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[24] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[25] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[26] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[27] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[28] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[29] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[30] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[31] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[32] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[33] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[34] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[35] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[36] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[37] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[38] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[39] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[40] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[41] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[42] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[43] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[44] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[45] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[46] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[47] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[48] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[49] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[50] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[51] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[52] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[53] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[54] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[55] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[56] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[57] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[58] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[59] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[60] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[61] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[62] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[63] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[64] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[65] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[66] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[67] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[68] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[69] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[70] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[71] Select Pt sensor type
Select Ni sensor type
Select TC sensor type
[72] Select Pt sensor type
