WDGDS10001

Torque support WDGDS10001

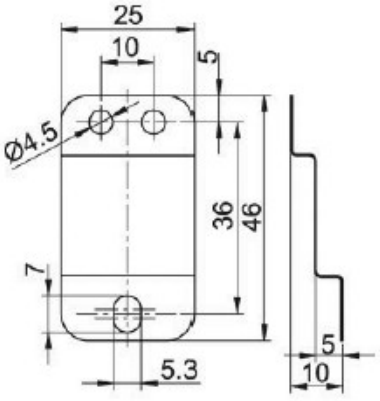

suitable for thru-bore or holllow bore
(blind) encoders (all types).
Is privieded as standard in the required
number with all hollow shaft encoders
and end hollow shaft encoders (except 36E).

Product data

Compensation	axial ±0.8 mm
	radial ±0.2 mm
Material	Stainless springsteel
Fixing	Screws for fixing to the encoder are enclosed.
	Screws for fixing to the machine are not supplied.
Order number(s)	
WDGDS10001	Torque support

Drawing WDGDS10001

All dimensional specifications in mm

All bending radii R
Size of plate t=0.3
