WDGDS10007

Torque support WDGDS10007

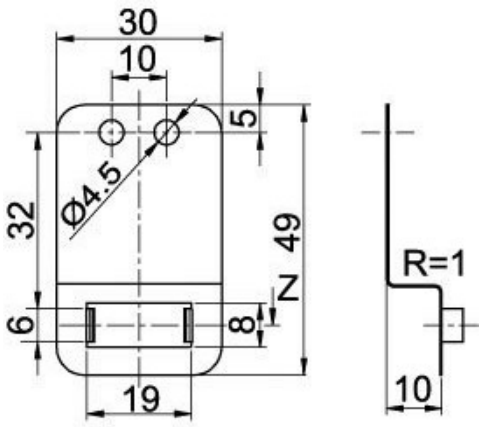

Torque support for hollow shaft encoders
and end hollow shaft encoders
(all types, except 36E)

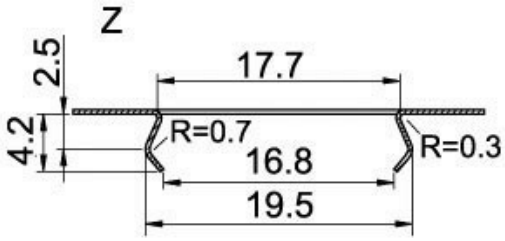

Product data

Compensation	axial ±0.5 mm radial ±0.2 mm
Material	Stainless springsteel
Fixing	Screws for fixing to the encoder are enclosed. Locking attachment for motor hood protective relay with 10 mm hole rasters (8 mm hole, 2 mm bridge), Operating speed: max. 2500 min-1
Order number(s)	
WDGDS10007	Torque support

Drawing WDGDS10007

All bending radii R
Size of plate t=0.3

All dimensional specifications in mm
