SOLDERING TIP

PLEASE READ ALL INSTRUCTIONS AND WARNINGS BEFORE USE.

TO REPLACE TIP:

NOTE: Do not change tips while hot. Cool tip to room temperature before changing.

1. Using a screwdriver, loosen the two tip connector screws. Remove tip by sliding tip out of tip connectors.
2. Slide new tip into connectors. Using a screwdriver, firmly tighten the two tip connector screws.
3. During use, check to make sure the connector screws remain tight by occasionally retightening with screwdriver.
4. Where tip and gun connectors touch and overlap, keep the areas clean for best results.

TIN TIP BEFORE USING:

Melt solder on tip end surfaces as tip heats up but before tip reaches full heat.

WARNING

This product, when used for soldering or similar applications, can expose you to chemicals including lead known to the State of California to cause cancer and birth defects (or other reproductive harm). For more information go to www.P65Warnings.ca.gov
Note: Lead-free solder is recommended.
