

Angle Changer, Transparent

OPT2417

Part Number

Technical Data

Optical Data

Beam angle $\pm 7^\circ$

Polarization Filter no

Mechanical Data

Housing Material ABS, PC, PVAL, TAC

- **High-performance tool for creating the curve effect**

The OPT2417 is an optically clear window that allows almost 100% of the light to pass through. It can be used in combination with other angle changers to achieve variable light output over the length of a single bar light. This allows the curve effect to be created.

Complementary Products

Bar light OPT2400 – OPT2406
