Cat6a Industrial Ethernet Cable

Part Number Wire/Cable Type Flexibility Minimum Cut Length (ft)* Approximate Weight (lb/ft) Price per for the Length (ft)* A104338-1 Cat6a industrial Ethernet Flexible 20 0.04 \$;;5,x]: Physical Properties Conductor Gauge 26 AWG Conductor Stranding 7-stranded bare copper	
Physical Properties	:
Conductor Gauge 26 AWG Conductor Stranding 7-stranded bare copper	
Conductor Material Bare Copper Conductor Insulation Wall Thickness 0.019 in; nominal	
Conductor Assembly 4 twisted pairs Bare Conductor Diameter 0.010 in; nominal	
Pair 1 Blue, White/Blue Insulated Conductor Diameter 0.048 in; nominal	
Color Code Pair 2 Orange, White/Orange Twisted Conductor Diameter 0.096 in; nominal	
Pair 3 Green, White/Green Overall Cable Diameter 0.252 in; nominal	
Pair 4Brown, White/BrownJacket ColorGreen	
Voltage Rating300VJacket Thickness0.030 in; nominal	
Temperature Rating -40 to 80 °C (-40 to 176 °F) Jacket Material PVC	
Plenum No Sunlight Resistant No	
Shield Shielded Oil Resistance Yes	
Drain No Flame Retardant Yes	
Conductor Insulation Material Special Polyolefin	
Minimum Bend Radius 1.51in Sample Print Legend E331628 c(UL)us CMĠ 75°C RoHS	<dat< th=""></dat<>
Cabled Core Diameter 0.192 in YYWW> UKCA CE-44 <metermark< th=""><th>arking>r</th></metermark<>	arking>r
Electrical Characteristics (for 100 meters of cable)	
Impedance (1-100 MHz) 100 Ω 1 – 100 MHz UL Classification (cULus) TYPE CMG	
Capacitance 14.94 pF/ft @ 1MHz; Nominal Approvals** cULus, CE, RoHS	
Resistance, Max. 76.8Ω DC per 1000ftAttenuation Crosstalk Ratio, Far End (ACRF) $1 \le f \le 500$ MHz: $27.8 - 20$ LOG($f/100$) dE	dB MIN
Dielectric Withstanding, Min. 1500V RMS Insertion Loss $1 \le f \le 500 \text{ MHz: } 1.82 \sqrt{(f)} + 0.0091(f) + 0.20 \sqrt{(f)} + 0.20 \sqrt{(f)} + 0.0091(f) + 0.20 \sqrt{(f)} + 0.20 $	0.25/√(ƒ
Return Loss 1 ≤ f < 10 MHz: 20 + 5 LOG(f) dB MIN	dB MIN
Near End Crosstalk (NEXT) $1 \le f \le 500 \text{ MHz: } 44.3 - 15 \text{ LOG}(f/100) \text{ dB MIN}$	
Power Sum Near End Crosstalk (PSNEXT) $1 \le f \le 500 \text{ MHz}$: 42.3 - 15 LOG($f/100$) dB MIN	
TCL 1 ≤ f ≤ 250 MHz: 30 - 10 LOG(f /100) dB MIN	
ELTCTL $1 \le f \le 30 \text{ MHz}$: $35 - 20 \text{ LOG}(f) \text{ dB MIN}$ Cross Section	
Velocity Of Propagation 0.77%	
Delay $4 \le f \le 500 \text{ MHz: } 534 + 36/\sqrt{f \text{ ns MAX}}$	
Delay Skew 1 ≤ f ≤ 500 MHz: <25ns/100m

^{**} To obtain the most current agency approval information, see the Agency Approval Checklist section on the part number's web page at www.AutomationDirect.com

Please Note: Our prices on Continuous
Flexing IE Cable are closely tied to the
market price for copper. This allows us to offer
the best savings possible if conditions are favorable;
however, it also means that our prices may
increase if market conditions warrant.

LUTZE Industrial Ethernet Cables

LUTZE Industrial Ethernet Cables

Many industrial applications expose cables to hazards that are not present in commercial data cabling installations. Although a cable suited for commercial applications may initially work in a harsh industrial environment, it could quickly fail when used in an industrial application. While commercial grade cables may have a low initial product cost, downtime due to premature failure can be avoided by using a cable that has been designed and tested for the industrial environment. LUTZE's Industrial Ethernet cables were developed to survive the many industrial hazards that commercial cables will not, such as oils, harsh chemicals and cleaning agents often associated with the factory floor.

There are more than just physical hazards to overcome in an industrial application; electrical threats pose an issue for Ethernet cables as well. The presence of EMF/EMI can create a real issue for communication networks and where you can use a shielded commercial product. In most cases, the shielding provided is a single layer of foil which is adequate for installation away from the factory floor. However, when dealing with electrical noise generated by motors and switching equipment, commercial cables struggle to meet the demands of a typical industrial environment. The Industrial Ethernet cables from LUTZE are made with both a foil layer and a tinned copper braid to provide superior noise rejection compared to the commercial counterparts.

Furthermore, commercial Ethernet cables have a tube jacket surrounding the conductor pairs with room within for the pairs to move around and even untwist in applications requiring constant motion. This results in early mechanical or electrical failure of the cable. LUTZE continuous flexing Industrial Ethernet cable have a jacket that is pressure extruded over the cable core, effectively "locking" the conductor pairs in place. This type of jacket construction provides very stable electrical performance, even when the cable is impacted, bent, or repeatedly flexed. Pressure extrusion also provides a very smooth, round, and firm jacket profile that is crush resistant and ideal for obtaining a reliable termination and seal when installing connectors.

Features

- Available in Category 5e, 6 and 6a
- In compliance with TIA 568-C.2 and TIA 1005
- Designed for use in EtherNet/IP systems *
- 26-22 AWG stranded or 22 AWG solid
- 2 or 4 twisted pairs
- Shielded constructions
- Rugged TPE and PVC jacket options
- UL Type CMX OUTDOOR CM and UL AWM Style 2463 (80°C, 600V)
- · Cut to length in 1-foot increments
- · Low 20-foot minimum length
- * EtherNet/IP is a trademark of ODVA, Inc.

Description

AutomationDirect offers Lutze Industrial Ethernet cable in 2 and 4 pair, unshielded and shielded constructions. Conductors are color coded high density polyethylene insulation. Shielded constructions include both a tinned copper braid shield and aluminized polyester foil overall shield. All constructions feature a rugged jacket with excellent moisture, chemical, UV and weathering resistance, exceptional low-temperature flexibility, and good flame and fire resistance. Some are specifically designed and constructed for continuous flexing applications. Agency approvals include UL Type CMX OUTDOOR, UL Type CMG/PLTC, UL AWM Style 2570, and UL AWM Style 20201.
