

GS3 *DURAPULSE* Accessories – Feedback Card

Feedback Card for *DURApulse* AC Drives

Part Number	Price	Drive Model
GS3-FB	\$;0eof;	GS3-xxxx

The GS3-FB feedback card is for use only with *DURAPULSE* AC drives.

Description

The GS3-FB card is used to add another layer of precision control to the already precise control algorithm utilized in the *DURAPULSE* drive series. This added control is activated by selecting control modes V/Hz closed loop control or sensorless vector with external feedback. The feedback mechanism uses pulses generated by an external encoder or pulse generator. Unlike other feedback types, the GS3-FB accommodates the four most common encoder signal types: output voltage, open collector, line driver, and complimentary.
