

BRYANT®

Manual Motor Controllers / Disconnects

Overview

Bryant motor controllers are "suitable as motor disconnects," which means that a motor controller marked as such can also be used as a motor disconnect. From a safety perspective, this means a motor load can now be isolated and locked-out in one convenient location. By utilizing Bryant's compact motor controllers and disconnects, you benefit through the convenience of one device fulfilling two needs. A motor controller is simply used to activate a motor load "ON" or "OFF" and perform this function thousands of times. A motor disconnect, however, is designed and tested to withstand motor overloads and high short-circuit fault currents while maintaining the ability to disconnect the motor for service or maintenance.

According to the 2008 National Electric Code (NEC®) article 430.102, all motor controllers must have a disconnecting means located within the line of sight of the controller. Because the NEC® recognizes that a controller and disconnect can be the same unit (article 430.109), Bryant has designed a compact controller that will also meet the rigorous demands of a motor disconnect. Bryant's controllers are listed as "Suitable as Motor Disconnect" under UL Standard 508 – Industrial Control Equipment – qualifying them to perform both operations in one compact package.

TECH·SPEC®

Features and Benefits

- Thermoset body provides high resistance to electrical arc tracking.
- Silver alloy contacts for excellent conductivity and extended life
- Available NEMA 1, 3/3R and 4X enclosures
- Undrilled enclosures available for custom placement of entry positions
- Lockout / Tagout capability
- Switch sizes in 30, 40 and 60 Amps up to 600 VAC
- 2-pole and 3-pole switch configurations
- Use in indoor and outdoor environments
- Quick make, slow break design
- UL Listed as "Suitable as Motor Disconnect" under UL 508
- Wiring conduit knockouts on NEMA 1 and 3R controllers / disconnects
- Compact design

Applications

- Can be used locally at the motor
- "Suitable as a motor disconnect"
- Across-the-line motor starting
- Industrial machines
- Automation
- Switch contacts AC rated only (not DC rated).

Listings

- UL Listed and Recognized Category NLRV, UL file #E70402
- CSA Certified File 46186
- Flammability - UL94HB/V
- Standards
 - UL508
 - UL60947-1
 - CSA C22.2 No 14

BRYANT®

Manual Motor Controllers / Disconnects

Enclosed Toggle Switch

Enclosed toggle AC manual motor controllers feature NEMA 1 or NEMA 3R enclosures and can be used as motor controllers or disconnects. The NEMA 1 metal enclosed switches are ideal for use in indoor environments. The thermoplastic and metal NEMA 3R enclosed switches are raintight for use outdoors.

Enclosed Toggle Switch Features

NEMA 1 Motor Controllers / Disconnects

Wiring conduit knockouts

- 1/2 inch and 3/4 inch NPT
- Top, bottom or back wire entry points
- Surface mount control

NEMA 3 / 3R Motor Controllers / Disconnects

- Raintight enclosures
- Designed for surface mounting

All aluminum cover and base; base is pre-drilled for rear surface mounting

Lockout / Tagout capability

30103D

Valox® enclosure; chemical and impact resistant

External activation lever switch

Lockout / Tagout capability

30323D

Installer determined wire entry; no pre-drilled openings or knockouts

TECH·SPEC®

30303D

Rain tight drip shield top; rolled seamless sides

All aluminum cover and base; base is pre-drilled for rear surface mounting

Wiring conduit knockouts; 1/2 inch NPT KO for 30 amp; bottom or back wire entry points

Lockout / Tagout capability

60303D

All aluminum cover and base; base is pre-drilled for rear surface mounting

Wiring conduit knockouts; 3/4 inch / 1 inch NPT KO for 60 amp; bottom or back wire entry points
