

# L-Series Rodless Pneumatic Cylinders

NITRA L-Series Rodless Cylinders offer a robust design in a compact package. Rodless cylinders can offer the same stroke as rodless cylinders in a smaller space. All sizes have magnetic pistons and are double acting. Mounting brackets and cylinder position switches are sold separately.

## Features

- Rodless cylinder design
- Double acting with magnetic piston
- Front and rear adjustable cushions
- Tapped end caps mount
- 16mm to 40mm bore sizes available
- 100mm to 1000mm stroke lengths available
- Operating pressure: 1 to 8 bar (14.5 to 116 psi)
- Temperature range: -10 to +80°C (14 to 176°F)
- 2-year warranty

## Torque Information

**NITRA L-Series Rodless Pneumatic Cylinder Force and Torque Information**

Bore	Center Distance Y	Actual Force F at 6 bar [N]	Cushioning Stroke [mm]	Max. Load Ln [N]	Mp Max [Nm]	Mr Max [Nm]	My Max [Nm]
16	9	110	15	120	4	0.3	0.5
25	14	250	21	300	15	1	3
32	18	420	26	450	30	2	4
40	22	640	32	750	60	4	8

**Note:** When the cylinder is subjected simultaneously to torque and force, use the following equations, where the lengths have to be given in meters.

$$Mp = La \times ha \quad Mr = Ln \times hv + Lt \times hr \quad My = La \times hv$$

$$\frac{My}{My_{max}} \leq 1; \quad \frac{Ln}{Ln_{max}} \leq 1; \quad \frac{Mp}{Mp_{max}} + \frac{Mr}{Mr_{max}} + 0.22 \times \frac{My}{My_{max}} + 0.4 \times \frac{Ln}{Ln_{max}} \leq 1$$

# L-Series Rodless Pneumatic Cylinders

## Load Information

## Speed and Maximum Cushionable Load

For the cylinder to reach the end-of-stroke position without intense or repeated impact which would damage it, it is necessary to annul the kinetic energy of the moving mass and the work generated. The maximum cushionable load depends on the traversing speed and the absorption of the air buffer supplied standard with the various cylinders. The diagram shows the speeds and cushionable mass for the various diameters at a pressure of 6 bar (87psi).

# L-Series Rodless Pneumatic Cylinder Accessories

NITRA L-Series accessories include end mounting brackets and center support brackets for longer cylinders. Refer to load chart in this section to determine if a center support is required. Sensor clamp brackets are required for 16mm and 25mm bore cylinders.
