# **DYSense Thermocouple Heat Trace Probe** with Connection Head

### **Overview**

Heat Trace Thermocouples are used to measure the surface temperature of process pipe that is carrying products whose temperatures must be controlled to prevent freeze-up, or to maintain a viscosity level so that the inner medium will flow.

### Probe

- Type J thermocouple element
- 1/4" diameter, 316 SS sealed sheath to protect against harsh environments
- 3" hot leg with 1"x2" weld pad for mounting to pipe surface
- Mounting weld pad is flexible enough to be formed around nominal pipe sizes from 1" to 12"
- 4" cold leg allows for electrical connections outside of pipe insulation
- Connection Head
  - Cast aluminum NEMA 4X, IP66 screw cover head with captive gasket
    - One turn cover removal & installation eliminates cross threading and saves time
  - 3/4" NPT conduit opening with internal stop to prevent overtightening and installation damage
  - Gripping ribs on cover edge
  - Stainless steel cover chain
- Wiring
- Brass terminals with stainless steel screws eliminate the need to wrap connections around screws
- Elevated terminal block for easy wire termination
- Made in the USA

Thermocouple Heat Trace Probe with Connection Head								
Part Number	Pcs/Pkg	Wt (lb)	Price	Туре	Probe Length	Temperature Sensing Range	Mounting	
<u>THMJ-HT34-01</u>	1	1.44	\$-54kj:	J	3" Hot Leg / 4" Cold Leg	-18 to 482°C (0 to 900°F)	1" X 2" X R3/4" Weld Pad, 304 SS*	

\* Mounting pad is flexible enough to be formed around nominal pipe sizes from 1" to 12"

Technical Specifications					
Junction Type	Ungrounded				
ASTM E230 Standard Limits of Error	±2.2°C (±4.0°F) or 0.75%, whichever is greater				
Probe	ø1/4", 316 stainless steel sheath, single thermocouple element				
Connection Head	Die-cast aluminum, screw cover with stainless steel chain, compressed graphite gasket, NEMA 4X, IP66, 3/4" NPT conduit opening, max temp. 400°F (204°C)				
Response Time	2.9 seconds, 63.2% of a 25-77°C step change per method ASTM E839				
Wiring	Connection head: Ceramic terminal base with brass terminals and stainless steel screws (Recommended tightening torgue 3-4 lb-in)				
Thermocouple extension lead wire available at www.automationdirect.com.					

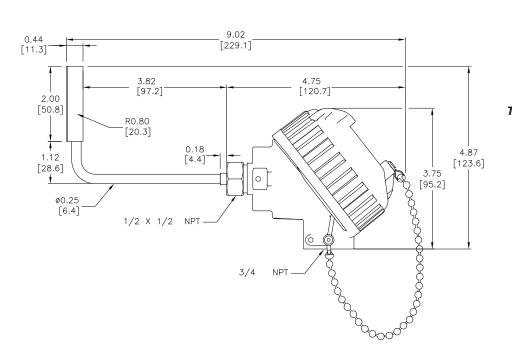

Note: Check the chemical compatibility of the sensor's wetted parts with the medium to be measured.

## **Dimensions**

### inches [mm]

# Wiring Information

*pe J.* (+) *white (-) reu* 

- Must use thermocouple extension lead wire
- Observe polarity when making connections
- Do not use standard wire nuts

• Recommended screw terminal tightening torque 3-4 lb-in
