Supplementary Protectors for overcurrent protection

The Cutler-Hammer™ WMS series of supplementary protectors from Eaton Corporation provide overcurrent protection where branch circuit protection is already provided or is not required.

They are thermal magnetic and protect against short circuit and overload conditions. These DIN-rail mounted supplementary protectors are available in three trip curves:

- **B curve trip point at 3 to 5 times rated current**
- **C curve trip point at 5 to 10 times rated current**
- **D curve trip at 10 to 20 times rated current**
- **One, two and three-pole models**
- **UL, CSA and IEC recognized**
