EA1-S3MLW
3-inch model

Touch and non-touch 3-inch models are also available, starting at just \$149. These units offer all the same software features as their big brothers, and also have optional keypad bezels for additional flexibility.

C-more Micro-Graphic panels are packed with features yet still priced for the tightest of budgets. With the addition of the larger 6-inch sizes, you can display even more text, graphics, or bitmaps to effectively communicate and display data to the operator. Two 6-inch models are available (standard or high-contrast background), offering the same base features.

Both 6-inch units have touch screens and display STN monochrome graphics, however the configurable screen backgrounds let you use color to convey meaning. Mount either unit in portrait or landscape orientation - they function either way!
