micro

Get a big bang for your buck with 8- and 10-inch panels

Need basic graphics and text but lots of real estate? The latest additions to our C-more Micro panel series can accommodate up to 133 lines of static text in portrait orientation, and up to 100 lines in landscape mode. You can also use dynamic text with embedded variables. Take advantage of the clear and colorful graphics on the **TFT color touch screen** to create a vibrant and intuitive operator interface. Serial communications keeps the cost down for simple installations.

FREE programming software offers the choice of using many built-in objects, such as buttons, bar graphs and data entry keypads. Or import your own custom graphics, and save to libraries for use in multiple projects. Alarm control, recipes and a built-in project simulator are time-saving tools for more complex applications.

All these features at a competitive price, in a rugged and reliable package, give you a sweet HMI for even the smallest control system.

* The programming software is free when downloaded from the AutomationDirect Web site, or the CD-ROM package can be purchased for \$25 (part # EA-MG-PGMSW).

Standard features

- Lots of screen space for graphics and text
- 32k color TFT touch screen display
- 800 x 600 dot resolution
- Expansive 30 MB memory
- Seven durable function keys with LED indicators
- Standard Type B USB programming port
- 15-pin and RJ12 serial communications ports
- Enhanced objects and graphics
- Up to 999 screens (dependent on complexity)
- Recipes
- Built-in project simulator
- UL, cUL, CE agency approvals

Popular protocols/devices supported

- All AutomationDirect programmable controllers
- Modbus® RTU
- Allen-Bradley® DF1 half/full duplex, PLC-5® DF1 and DH485
- Siemens PPI
- GE SNPX
- Omron Host Link and FINS serial
- Mitsubishi MELSEC®
