

Get more value with NITRA valves!

Compact Modular Valves

Our NITRA line of compact modular pneumatic valves is an unbeatable value. Combining the supreme versatility of a modular design with sturdy mechanics, high performance, and an affordable price, make these NITRA modular valves the obvious choice.

- NITRA CMV systems offer flexibility from one to 16 valves with input and output terminals for tubing of different sizes
- Each valve is enclosed in a reinforced technopolymer (Celcon®) protective shell that acts as a shock absorber and prevents the infiltration of dirt
- 3-way/2-position, 5-way/2-position and 5-way/3-position valves available
- Valves include one-sided pneumatic connections with built-in push-to-connect fittings
- 2-year warranty

Three New Intermediate Modules Starting at \$46.00

These new additions to our NITRA CMV product line provide even more flexibility for your pneumatic applications. Additional air inlets, dual pressure needs, and quicker exhaust are provided with these low-priced intermediate modules.

- Through Module (CMV-D1X-3X) - provides additional air inlets for applications with a large number of high-flow valves
- Blind Module (CMV-D2X-3X) - provides dual pressures in a manifold by blocking the main supply from the left and connecting an independent supply to valves on the right
- Exhaust Module (CMV-D3X-3X) - provides a dedicated exhaust for valves to its right when quicker exhaust is required
