

It's time to spend less and **Do more!**

Powerful yet affordable...

The Do-more H2 series CPUs leverage industry-proven I/O hardware to create an incredibly powerful PLC - at an incredible bargain. The popular H2-DM1E CPU, available for \$399, comes with:

- (1) USB port for programming, (1) full-duplex serial port, (1) Ethernet port
- Several communication protocols including Modbus RTU, ASCII, Modbus TCP and EtherNet/IP
- Over 1M bytes total memory (includes program, data and documentation)
- Program/monitor/debug over any embedded communication port
- Supports up to 256 I/O in one base, and thousands more with optional Ethernet-connected I/O
- Powerful instruction set featuring easy-to-configure math, trending and motion
- H2-DM1 CPU (no Ethernet port) also available, for \$299

and that's not all...

- FREE software - with a built-in simulator!**
- FREE 30 days online training**
- FREE technical support**
- FREE shipping (orders over \$49)**

See what others are saying:

"Best value for money CPU. Powerful, yet easy to program. Excellent features and large memory. Good communication capabilities both for MODBUS and ASCII applications. Excellent combination of new features with trusty DL205 I/O modules..."
Neven in PORTLAND, OR

"This is simply the BEST PLC CPU on the market when you combine price and performance. The software is easy to use (not to mention free) and yet powerful with hundreds of available commands..."
Scott in HUNTSVILLE, AL

"This PLC is the most feature rich but easy to program PLC I have ever used. Its memory and speed is amazing..." Jordan in HAYS, KS
