with Hazardous Location Control Stations

Control Station Assemblies
starting at:
\$117.00 ea.

Legend Plates
\$9.00 ea.

Factory Sealed (FXCS Series) and Unsealed (XCS Series) Hazardous Location Control Stations

Killark control stations are designed to contain and extinguish explosions, making them ideal for installations in refineries, chemical and other processing facilities where flammable materials are present. These units' design allows for combustion gases to cool down, pass through, and release pressure without igniting any explosive environment.
