

# Get BIG DATA and BIG SAVINGS...

...with a new **Point of View!**

## HMI/SCADA Software

Point of View is powerful software for developing HMI, SCADA, and OEE/Dashboard projects for your control system that can be deployed anywhere. Create informative screens that are easily understood with detailed graphics, animations, alarms, data trends, and more. With Point of View you get advanced capability for a very practical price, no matter how small or large the system.

Starting at:  
**\$225 .00**  
PV-500-DEV  
(Development only package)

## BIG DATA...

### Database Connectivity:

Connect to any SQL database (MS SQL, MySQL, Sybase, Oracle), or MS Access or Excel, and ERP/MES systems (including SAP).

### FTP Transfer:

Automatically upload or download files during runtime to/from remote storage locations using FTP protocol and flexible scripting functions.

### Optimized Trend History:

Designed to load millions of values from SQL relational databases with high performance.

### Plus:

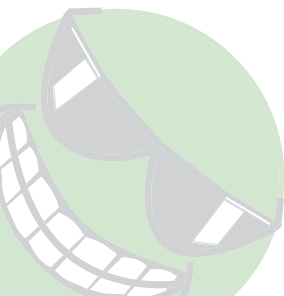

- Powerful scripting including VBScript
- System redundancy
- Web, Secure Viewer, and Mobile Thin Client connections
- Convenient PDF export
- Much, much more...

## BIG SAVINGS...
