Productivity® Series.....

The Productivity Series of controllers provides a scalable controls solution with three low-cost hardware platforms and one FREE, powerful programming package. Write a program in one controller and easily port to another so that no matter the application, big or small, Productivity has the I/O, communications and affordability you need.

All this and more... for less!

- Expansive 50MB of user memory with tag name addressing for custom memory allocation
- Scalable system with up to 59,840 I/O points possible
- Multiple built-in communication options with Modbus, ASCII and EtherNet/IP™ support
- Web server/mobile access
- Built-in data logging up to 32GB
- Real-time data displays
