

Go the distance

with new ultrasonic sensors

Long sensing ranges available

18mm and 30mm diameter ultrasonic sensors from AutomationDirect include high-resolution models with long sensing ranges. They are equipped with LED status indicators, and a push-button teach feature for configuring DC output models and for sensitivity adjustment on analog output models.

- 18mm models offer up to 2200mm sensing range, [new UT2F 30mm models reach up to 6 meters](#)
- [New short-body UK6 series good for tight spaces](#)
- NPN/PNP discrete outputs or variable analog output
- 2-meter embedded cable or M12 quick-disconnect
- CE, cULus file E187310, IP67 rated
- Lifetime warranty

Along with our great prices, you get:

- Same-day shipping (when ordered by 6 pm EST), with approved credit or credit card (see Web site for details)
- FREE 2-day (or better) delivery on most orders over \$49
- Free award-winning Tech Support
- 30-day money-back guarantee

Ideal for sensing objects of different materials

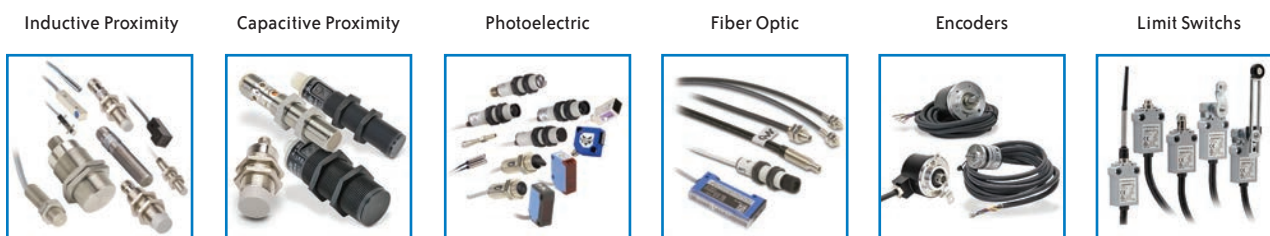

Ultrasonic sensors are ideal for applications in which the sensed object is made of clear, transparent or varying surface color materials. You can standardize on one sensor for many materials, without any extra setup or sensing concerns.
