

Dual-Shaft Stepper Motors

Now available at AutomationDirect!

SureStep®

High-Torque Stepping Motors

... with 1-ft. cable and 4-wire locking connector

SureStep stepping systems provide simple and accurate control of position and speed where open-loop control and cost are considerations. Pulses (or "step" and "direction" signals) from Do-more PLCs, DirectLOGIC PLCs, or other indexers and motion controllers are "translated" by the microstepping drive into precise movement of the stepping motor shaft.

The SureStep stepping motors use 2-phase technology with 200 full steps per revolution or 1.8° per full step.

Motor Features

- Available in single-shaft and dual-shaft models, starting at \$18
- Square frame step motor style produces high torque
- 2-phase bipolar, 4-lead
- 1.8° per step, 200 Steps per Revolution
- Standard NEMA Sizes (17, 23, & 34)
- CE Compliant - EN55014-1 (1993) & EN60034-1.5.11
