

Touch your panel from anywhere

Remote Access & Control for C-more HMI

The most practical touch panel now performs remote access and control!
With a Web browser on any PC, remote users can operate and monitor a local C-more HMI system from anywhere on the Internet or on a local network.

PREMIUM FEATURE AT NO COST!

No Additional Hardware required

The C-more Remote Access feature resides in all panels with Ethernet support, and requires no option modules. **Access real-time data or initiate an action on a control system from anywhere, any time.** (This feature requires software and firmware version 2.4 or later*, and an Ethernet-enabled C-more panel to function.)

WEB BROWSER BASED

Since applications can be downloaded from the C-more panel through a PC's Web browser, authorized users can access and control the panel remotely without purchasing or downloading additional software packages.**

AUTHORIZED USERS HAVE THE ABILITY TO REMOTELY:

- Monitor and control screen operations of the C-more panel as if touching the panel itself
- Test and troubleshoot the C-more project
- View, zoom, print and save screen captures of active screens

CONNECT TO CONTROLLERS WITH DRIVERS FOR:

- All AutomationDirect PLCs
- Allen-Bradley
ControlLogix®
CompactLogix®
