\$384.00

(PX-TCP2: 2-port Modbus TCP Coupler)

\$36.00

(PX-172-1: 2-point AC Input)

\$63.00

(PX-248: 8-point DC Output)

\$24.00

(PX-970: AC Power Feed Terminal)

\$277.00

(PX-334-K: Thermocouple)

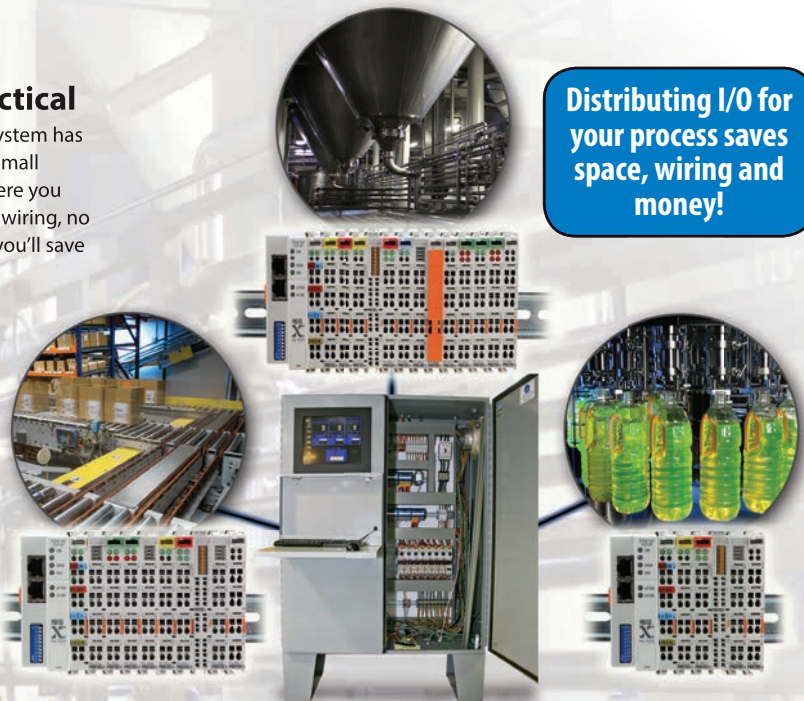

PROTOS^x

Xpansion I/O has never been so practical

Built to be versatile in the field, the new Protos X Field I/O system has a slim design with numerous I/O point configurations. The small footprint lets you install Protos X I/O assemblies exactly where you need them, even in tight locations. No need for excess field wiring, no need for unused I/O points and with the already low price, you'll save money again and again with Protos X.

- Rackless design for easy installation in areas with limited space
- Bus Couplers available in both Modbus RTU/ASCII and Modbus TCP protocols to integrate with a wide variety of controllers and SCADA/HMI packages
- Discrete terminals available in AC and DC with a variety of point configurations including: 2, 4, 8 or 16 points
- 2, 4 and 8-channel analog terminals with 4-20 mA, 0-10 VDC, and +/- 10 VDC capabilities, as well as, RTD and Thermocouple options
- Fully expandable up to 255 I/O terminals
- FREE, downloadable, easy-to-use configuration software tool
- A variety of power supply and power distribution options give you added versatility

Distributing I/O for your process saves space, wiring and money!
