

# Don't waste time with nickel-and-dime.

Get the Productivity2000 PLC with powerful, FREE software...

## FREE feature-packed PLC software

With Productivity2000, you always get dependable, full-featured hardware with FREE feature-packed software. Our Productivity Suite programming software was developed in-house with customer satisfaction as a primary objective. The result was programming software that is powerful, efficient, and easy to use.

Just check out what FREE will get you:

- Flexible tag name programming
- Convenient, fill-in-the-blank function blocks
- Time-saving hardware auto-discovery feature
- Built-in Web server and mobile connectivity for remote access
- Powerful Task Manager for increased efficiency
- Automatic tag creation with predefined tag structures
- Detailed Data view and histogram functionality
- **Recently added: Custom Ethernet communication protocols and ProNET (peer-to-peer) networking options for better communication**

## How good can FREE actually be?...

Now that's a great question to ask, why don't we let our customers answer it:

"Incredibly easy to use. Love the tag database, the several communication protocols available, the ladder logic is very user friendly. The price is outstanding. I've been replacing as much Allen Bradley PLCs as I can with these bad boys."  
Domenic in GLOUCESTER, MA

"Unbelievable performance and ease of use. Tag based addressing is wonderful. Already making plans to purchase additional P2000's."  
Matt in SPRINGFIELD, MO

"I am thoroughly impressed with the performance of the hardware and software. Some of the instructions are incredible time savers...What would have taken 32 messages in another product, I am doing with four in the P2-550..."  
Paul in NORMAN, OK

Download Productivity Suite today and try it out. No license fees or registration keys are needed and it's the full package - no restrictions - no limitations. That's a \$495 value - FREE!!
