

Get the PRO in COMMUNICATIONS

EtherNet/IP™

We make it easier to communicate

Now with EtherNet/IP™ as a native protocol, we make it easier to connect the powerful, cost-effective Productivity3000 controller to your existing systems. Configurable as a Scanner, Adapter, or both simultaneously, the P3-550 CPU supports Explicit or Implicit “I/O” messaging. Connect to EtherNet/IP enabled devices such as ControlLogix and CompactLogix controllers or Flex drives using the Productivity3000’s fill-in-the-blank style configuration and Message instructions. Whether you are configuring a new application or looking to expand an existing one, we can get you in control and connected for less.
