

# Safety is vital!

Do even more to protect what's important with safety devices from AutomationDirect

## Non-Contact Magnetic Locking RFID Safety Switches

New IDEM safety switches combine magnetic locking and Radio Frequency Identification (RFID) technology to provide you with the most secure, non-contact interlocking device for protection of both people and machinery. Available in plastic, die cast metal and IP69K-rated stainless steel models, these switches are designed to deliver the utmost safety and security!

- Heavy duty or medium duty holding force models available
- Master coded or uniquely coded actuation
- Two LEDs to indicate all the possible switch states (locked, unlocked, guard open, door forced open, wrong actuator code)
- Flexible actuator for a high degree of misalignment tolerance
- Able to connect to most popular safety relays to achieve up to PLe and Cat.4 for ISO3849-1

- RFID provides a high degree of anti-tamper, virtually impossible to override
- (2) N.C. (door closed - lock energized) safety outputs, overload protected
- (1) N.O. auxiliary output for indication of door open
- Set includes both switch and actuator

**Orders over \$49 get FAST FREE SHIPPING**

**Our shipping policies make it easier than ever to order direct from the U.S.!**

Fast free standard shipping\* is available for most orders over \$49 U.S., and that includes the brokerage fees (when using an AutomationDirect nominated broker). Using our choice of carrier, we can reach most Canadian destinations within 2 to 3 days. Order by 6pm ET and in-stock orders ship the same day!

\*2-day free shipping does not apply to drop-ships, or orders requiring LTL transport, but those shipments can take advantage of our negotiated super-low flat rates (based on weight) that include brokerage fees.
