

# Save money on motor control for AC Induction Motors

**NEW!**

## Stellar™ series compact soft starters save you money any way you look at it

**Save three ways** with our new Stellar series soft starters!

First, our low direct prices lower your initial purchase and installation cost.

Next, save on energy costs - when used instead of a traditional line starter, Stellar units perform controlled reduced voltage motor starting and stopping, then switch to internal contacts for efficient running at rated speed.

Third, since soft starters provide smoother control resulting in less torque, less shock, and less electrical and mechanical stress, you save wear and tear and reduce maintenance on your equipment.

### Features:

- 5–40A models @ 208–460V
- 24 VDC control voltage
- Easily and separately adjustable motor start and stop times up to 30 seconds
- Adjustable start pedestal voltage from 30 to 100%
- Two-phase control
- Internal bypass contacts for Run
- Six error/trip indications: AC Supply, Control Supply, Overheated, Bypass Failure, Shear Pin, Overcurrent
- Two standard-size widths: 45 and 55mm
- DIN rail mounting

### Mechanical Advantages

- Smooth acceleration; reduced shock and starting stress
- Extend lifespan of mechanical drive train components

### Electrical Advantages

- Reduced starting current
- More motors or larger motors can be started from lower-capacity power sources

### Economic Advantages

- Lower overall costs for new installations
- Reduced maintenance and replacement of mechanical drive train components

starting at  
**\$145.00** U.S.  
SR22-05

## Also Available:

AC motors

Gearboxes

### Optional Auxiliary Fans

- for 45mm and 55mm wide starters
- Increases starts/hour on many models
