

Use our tools *for machine maintenance*

Handheld Tachometers

Accurate, reliable test equipment is critical to maintaining and troubleshooting your plant's machinery. Portable tachometers from Shimpo let you measure the speed of rotating equipment such as motors and gearboxes conveniently and with high precision.

- DT-100A Series contact tachometers use microprocessor technology for superior accuracy
- DT-200LR Series contact/non-contact laser handheld tachometers can supply measurements from up to 20 feet away
- PT-110 non-contact laser tachometer with optical laser technology is cost-effective and simple to use

Stroboscopes

Shimpo handheld stroboscopes facilitate analysis of high-speed machinery by providing the illusion of "stopped motion", making them ideal for motion analysis, preventive maintenance and speed measurement of repetitive motion. Get timely data to troubleshoot situations involving vibrating parts, leaks and spray patterns.

- DT-311A heavy duty, AC-powered stroboscope also measures rotational or reciprocating speeds
- DT-315A heavy duty, rechargeable stroboscope offers the convenience of total portability
- DT-326 portable stroboscope uses super bright LED array for accurate, stable strobe light
- DT-725 lightweight rechargeable stroboscope constructed of high-impact plastic
- ST-1000 LED stroboscope/tachometer with LED flash technology requires less energy than xenon models
